DIRECTIONS to the NURSERY 50

Ordering Information

PRICES:

All prices listed in this catalog are effective July 1, 2020 to June 30, 2021. Prices listed are for wholesale sales.

ORDERS:

All orders are acknowledged upon receipt, based on availability and our projections.

Spring orders received by July 31 will receive priority during the acknowledgment process. Spring orders received after July 31 will be acknowledged based on availability.

Spring Final Confirmations will be mailed in early December subject to our crop yield and projection accuracy. Any customer initiated changes for spring shipments should be made by February 1.

SHIPPING:

Our minimum shipping quantity is 25 per variety for 1 gallon plants, 10 per variety for 2, 3, & 5 gallon plants, and 5 per variety for 7 gallons and above. All plants are shipped F.O.B., Melfa, Virginia, and freight is due at delivery. All plants are individually tagged with UPC codes.

Freight: We ship primarily on tractor trailers and will ship partial loads and prorate the shipping costs. Customers are responsible for unloading their own plant material. **TRUCK DRIVERS ARE NOT RESPONSIBLE FOR UNLOADING YOUR ORDER.**

Shrubs: Our minimum delivery for shrubs is \$2,500. All shrubs are shipped on shelved trucks to minimize damage in transit.

Trees: Our minimum delivery for trees is \$2,500. They are shipped separately from the shrubs to lessen freight cost by maximizing the size of the load. Pooled trucks are used and partial truckloads are prorated.

Fruit trees grown at our nursery in eastern Virginia break dormancy by mid-March. In early springs, this may occur even earlier. We recommend that customers take delivery of their fruit trees as early as possible. After trees break dormancy, their roots are very susceptible to freeze injury and they should be protected after shipment when sub-freezing temperatures are expected.

TERMS AND CONDITIONS OF SALE

TERMS:    

New accounts are shipped C.O.D. To established accounts, the terms will be net 30 days. Past due accounts will be charged 1-1/2% monthly service charge. We accept Master Card, Visa, American Express and Discover.

DELINQUENT ACCOUNTS:

In the event suit or legal action is instituted on any past due account, we reserve the right to seek recovery for all interests, costs, and attorney fees upon trial or any appeal thereafter. We also reserve the right to require that the venue for any such suit or action shall be Accomack County, Virginia, and the substantive and procedural law of the Commonwealth of Virginia shall apply.

CONDITIONS:

All orders are subject to crop yield, climatic conditions and other factors beyond our control. We will exercise care to have all varieties true to name. We warrant all stock to be healthy at the time of shipment. The purchaser assumes all risks after stock is delivered to the carrier. All complaints must be made to the carrier when the stock is delivered and indicated in writing on the Shipping Receipt. There is no further warranty, expressed or implied. In any event, our liability is limited to replacing plants free or refunding purchase price.

VOLUME DISCOUNTS

The following discounts are earned based upon total purchases during a calendar year. The discount percentage is deducted from the invoice as a line item. We will rebate all discounts as they are earned throughout the year. Accounts must be paid within specified terms to receive these discounts.

\$ 7,000	5%

GRASSES

KARL FOERSTER FEATHER REED GRASS – *Calamagrostis x acutiflora* ‘Karl Foerster’. Deep green, cool season, clump forming grass. Feathery flowers are bright pink-red and fade to buff. Foliage 2½’-3½”, blooms 6’. Zone 4.

OVERDAM VARIEGATED FEATHER REED GRASS *Calamagrostis x acutiflora* ‘Overdam’. Nicely variegated with vertical white stripes. Compact clumps 2-3’ with blooms 6’. Zone 4.

BLUE DUNE LYME GRASS – *Leymus arenarius* ‘Blue Dune’. Pointed blue foliage that is drought and salt tolerant. Narrow, spiked inflorescence turns light beige. Foliage 2-3’, blooms 3-4’. Zone 4.

LITTLE ZEBRA GRASS – *Miscanthus sinensis*. PP13008. This is a shorter and more upright grass and it keeps its yellow banded color all season. Flowers late summer and has winter appeal. Foliage height 3-4’ with 1’ plumes. Zone 5.

NEW! DIXIELAND MAIDEN – *Miscanthus sinensis* ‘Dixieland’. A compact, variegated Miscanthus. Lovely pink tinged plumes rise above dramatic variegated foliage. 2’-3’ wide x 3’-4’ tall when in bloom. Appreciates a full day of sun. Zone 4.

MAIDEN GRASS – *Miscanthus sinensis* ‘Gracillimus’. A tall, graceful, clumping grass with slender, weeping, silvery green leaves. White plumes are fan shaped. Foliage 5’, blooms 7’. Zone 5.

PORCUPINE MAIDEN GRASS - *Miscanthus sinensis* ‘Strictus’. Upright grass with green and yellow horizontal bands. Reddish blooms in Sept. Foliage height is 4-5’, with blooms 6-7’. Zone 5.

VARIEGATED JAPANESE SILVER GRASS – *Miscanthus sinensis* ‘Variegatus’. The thin bladed, green and white variegated leaves give this grass its stately, vase-like appearance. Creamy-pink plumes appear in late summer. Foliage height 4-5’, with blooms 6-7’. Zone 4.

PINK MUHLY GRASS – *Muhlenbergia capillaris*. This blue-green, needle-like foliage produces dark pink, delicate seed heads in the fall that seem to float above the foliage. Grass turns a soft wheat color in late winter. Habit is mounding 3-4’, blooms 4’. Zone 6.

NORTHWIND PANICUM – *Panicum virgatum* ‘Northwind’. An ornamental grass with sturdy stems that stay upright. An excellent vertical accent in the landscape. Foliage emerges in shades of olive to blue-green and turn yellow as autumn approaches. Open and airy panicles produce showy seed heads which attract birds and add interest to the winter garden. Compact and clumping. Good for areas where erosion may occur. 4’-6’ in height x 2’- 3’ wide. Zone 4.

SHENANDOAH SWITCH GRASS – *Panicum virgatum* ‘Shenandoah’. Leaves are green in early summer turning deep wine by September. Foliage 2-3’, blooms 4’. Zone 4.

CASSIAN FOUNTAIN GRASS – *Pennisetum alopecuroides* ‘Cassian’. A lovely ornamental grass with showy pink tinged blooms. This ornamental grass performs nicely in full sun or part shade.

Good focal interest when planted near pools or ponds. Overall height and spread 2’- 2 ½’. Zone 5.

FOUNTAIN GRASS – *Pennisetum alopecuroides*. Slender green leaves turn golden yellow in the fall. Beautiful silvery foxtail flower plumes from July-September. Foliage height is 2-3’, with blooms 3-4’. Zone 5.

NATIONAL ARBORETUM BLACK FLOWERING FOUNTAIN GRASS – *Pennisetum alopecuroides* ‘National Arboretum’. Glossy green leaves form a neat mound that produces dark purple flowers. Foliage height is 2’, with blooms 3’. Zone 5.

KARLEY ROSE FOUNTAIN GRASS – *Pennisetum orientale* ‘Karley Rose’. Grass is clumping, with graceful, arching, blue-green blades. Purple foxtail flowers form late spring into fall. Foliage height is 16-18”, with blooms 3-4’. Zone 6.

STANDING OVATION BLUESTEM – *Schizachyrium scoparium* ‘Standing Ovation’. PP25502. It’s all about color! Stems are a spiky bluish-green turning brilliant, fiery shades of orange, red and yellow in the fall. Seed heads are an excellent food source for birds. Tight and upright habit. Mature at 3’, 4’ when in flower. Zone 3.

#3.....\$17.90

ENCORE® AZALEAS

NEW! AUTUMN BRAVO®
PP11628. Putting on quite a show, this Encore® selection sports 2" single, blazing red blooms complimented by dark green foliage. Mature at 4' tall x 4 ½' wide. Zone 6.

AUTUMN CARNATION™
PP15339. Now gardeners can enjoy in spring, summer, and fall the rich medium pink blooms seen once a year on the Pink Ruffle azalea. The exceptional flower quality, color and lustrous dark green foliage make this variety an excellent landscape addition. Mature size 4-5' H x 4' W. Zone 6.

NEW! AUTUMN CARNIVAL®
PP12111. Excellent contrast plant. Fluorescent 2½" pink blooms are stunning against deep green foliage. Compact habit. Mature at 3' tall by 3½' wide. Zone 6.

AUTUMN EMBERS™
PP10581. One of our most popular varieties, Autumn Embers' deep orange-red blooms make a colorful statement in any landscape. Mature size 3' H x 4' W. Zone 6b.

NEW! AUTUMN FIRE™
PP28279. True red 2½" blooms in spring, summer and fall. Glossy green foliage intensifies to purple bronze hues in winter. Slow growing. Can be maintained at 2'-3' tall by 3' wide. Zone 6.

NEW! AUTUMN JEWEL®
PP25074. Year-round color with pink blooms in spring, summer and fall and attractive purple foliage in winter. Mature at 4' tall and wide. Zone 6.

AUTUMN LILY™
PP25073. White blooms with an occasional single purple stripe are a classic compliment to the deep green foliage of this reblooming azalea. A good choice for mass and foundation plantings. One of the most cold hardy in the Encore® azalea series. Mature at 5' x 4'. Zone 6.

AUTUMN ROYALTY™
PP10580. A robust upright variety with deep green foliage and large, rich purple blooms, Autumn Royalty was voted Azalea of the Year by the American Rhododendron Society. Mature size 4-5' H x 4' W. Zone 6.

AUTUMN SANGRIA™
PP15077. With one of the largest blooms in the Encore® Azalea collection, an especially dense growth habit and a gorgeous dark pink and green color combination, Autumn Sangria is well suited as a specimen or a foundation planting. Mature size 4-5' H x 4' W. Zone 6.

AUTUMN SUNSET™
PP16248. The blooms of this Encore® variety pay homage to the vivid orange-reds of spectacular sunsets. With its deep green foliage, Autumn Sunset™ makes a significant color impact in any garden setting. Mature size 4' H x 3-4' W. Zone 6.

AUTUMN TWIST™
PP12133. Amidst the unique white and purple striped blooms an occasional, completely purple bloom will appear. Combined with its beautiful dark green foliage, Autumn Twist's unique color pattern makes this variety a festive and fast growing addition to any garden. Mature size 4-5' H x 4' W. Zone 6.

#3\$17.90

ARONIA

LOW SCAPE® MOUND CHOKEBERRY®
A. melanocarpa. PP28789. Add \$.50 for royalty charge. A low growing ground-cover shrub with glossy-green leaves which in spring is covered in dainty white flowers. By fall, the flowers have turned into dark purple-black fruit which contrasts nicely with brilliant red foliage. Tough, tolerant and tidy. Thrives in most conditions. Mounded habit, mature at 1'- 2'. Zone 3.

#3\$16.25

BERBERIS

CONCORDE JAPANESE BARBERRY – *B. thunbergii f. atropurpurea* 'Concorde'. An excellent choice for containers or small gardens. This dense and compact dwarf has deep maroon-purple foliage which intensifies in the fall before dropping. A few bright red berries may follow the small yellow flowers. Little to no viable seed produced. Mature at 18"-24" tall and wide. Zone 4.

ROYAL BURGUNDY® – *B. thunbergii* 'Gentry's Cultivar'. PP9461. Royalty charge 35¢. Fine textured, petite, deep maroon foliage. A true dwarf that requires little to no pruning. Mature 5'. Zone 4.

#3, 12-15"\$13.95
#3, 15-18"\$15.60
#3, 18-21"\$17.55

BUDDLEIA

LO & BEHOLD® 'BLUE CHIP' –

B. hybrid. PP19991. Add \$.50 for royalty charge. 'Blue Chip' has mounding habit that stays under three feet tall. Virtually low-to-no maintenance, this variety produces a fragrant blue-purple flower spike that attracts both butterflies and hummingbirds. Blooms mid-summer to frost. Mature height 3'. Zone 5.

LO & BEHOLD® 'ICE CHIP' – *B. hybrid.* PP24015. Add \$.50 for royalty charge. This compact white flowering buddleia makes a great ground cover. Blooms all summer and fall and is suitable for a low border or a container. Mature height 2'. Zone 5.

LO & BEHOLD® 'LILAC CHIP' –

B. hybrid. PP24016. Add \$.50 royalty. A charming small buddleia with soft lavender-pink flowers that attract butterflies and hummingbirds to the garden. This selection is seedless, reblooms until frost and is not appealing to deer. Plant in full sun. Mature at 18"-24". Zone 5.

LO & BEHOLD® 'PINK MICRO CHIP'

B. 'Pink Micro Chip'. PP26547. A small plant, which has a look of salvia because of its uniquely colored blooms, with the long blooming habit of a buddleia. Mature at 1.5'-2' tall and wide. Zone 5. Royalty charge \$.50

LO & BEHOLD® 'PURPLE HAZE' –

B. hybrid. PP24514. Add \$.50 for royalty charge. Uniquely horizontal branches produce an abundance of dark purple-blue flowers. Fragrant purple-blue flowers radiate outward and downward like a pinwheel, and are continuous from mid-summer to frost. Spreading habit. Non-invasive. Attractive to butterflies and hummingbirds, but not to deer. Mature height 3'. Zone 5.

MISS MOLLY – *B. hybrid.* PP23425. Add \$.50 royalty. A vibrant focal point which attracts butterflies and hummingbirds to the summer garden. Fragrant flowers are a

rich sangria red color. A nice selection in a mixed border or wildlife garden. Resists deer. height and spread, 4'-5'. Zone 5.

NEW! PUGSTER® AMYTHYST –

B. x 'SMNBDL'. PP30236. Large and full, amethyst toned flowers have a tiny yellow-orange eye in the center. This compact buddleia seems much larger because of its thick stems and full, non-stop flowers from early summer through frost. Mature at 2' tall and 2' wide. Royalty charge \$0.50. Zone 5.

PUGSTER® BLUE – *B. 'SMNBDBT'.*

Described as a better blue, this stocky buddleia is adorned with enticing dark violet-blue flower heads. Reblooms in summer. Mature at 2' x 2'. Zone 5. Royalty charge \$.50.
#3\$15.60

BLACK KNIGHT – *B. davidii.* Very dark purple flowers. Dense habit. Mature height 5-7'. Zone 5.

HONEYCOMB – *B. x weyeriana.* The best yellow flowering buddleia. Mature height 5-6'. Zone 5.

LOCHINCH – *B. fallowiana x B. davidii.* Great silver foliage. Sweetly scented flowers are lavender-blue with orange eyes. Mature height 10'. Zone 6.

NANHO BLUE – *B. davidii var. nanhoensis.* Long blue flower spikes appear from early summer into fall. Compact habit. Mature height 4-5'. Zone 5.

PINK DELIGHT – *B. davidii.* Excellent compact growth, pure pink flowers and attractive silvery foliage make this variety a winner. Mature height 6'. Zone 5.

ROYAL RED – *B. davidii.* Rich purplish-red flowers from July till frost. Mature height 6-8'. Zone 5.
#3\$13.80

BUXUS

GREEN MOUNTAIN – *B. microphylla koreana x B. sempervirens.* This variety is more upright and pyramidal in form with small green leaves. Excellent for hedging. Mature size 5' x 3'. Zone 5.

GREEN VELVET – *B. microphylla koreana x B. sempervirens.* A hardy yet slow grower with dark green leaves and a rounded full bodied form. Excellent retention of green color year round. Mature size 3-4'. Zone 5.

#3, 12-15"\$18.50
#3, 15-18"\$23.30
#3, 18-24"\$28.10

CALLICARPA

EARLY AMETHYST – *C. dichotoma.* Small lavender-pink flowers bloom through summer, later revealing massive amounts of showy lilac berries. Round and bushy habit. Mature size 4' x 4'. Zone 5.

#3, 15-18"\$15.10
#3, 18-24"\$17.30

CAMELLIA

APRIL BLUSH CAMELLIA – *C. japonica.* 'April Blush' grows into the classic Camellia bush with deep green leaves, shell-pink semi-double blooms. It sets buds freely, and flowers in mid-season. The relatively slow growth guarantees dense leaves and a plant of smaller stature. Mature height 6-8'. Zone 6.

APRIL ROSE CAMELLIA – *C. japonica.* This very compact and relatively slow-growing plant has rose-red formal double flowers. The medium sized blooms are very pretty and bloom late in the season. Mature height 8-8'. Zone 6.

APRIL SNOW CAMELLIA – *C. japonica 'April Snow'.* Lovely white, rose form double flowers on a compact, relatively slow growing plant. This camellia has a heavy bud-set and blooms in late season. Mature height 8'. Zone 6.

APRIL TRYST CAMELLIA – *C. japonica.* A nicely shaped plant with an abundance of bright red, anemone-form flowers. Blooms mid-season. Upright habit. Mature height 6-8'. Zone 6.

NEW! SPRING'S PROMISE CAMELLIA – *C. japonica*. An upright and compact camellia that blooms mid season. The rose red single flowers have strong yellow stamens and are slightly fragrant. Mature size is 5-8'. Zone 6.

NORTHERN EXPOSURE CAMELLIA – *C. sasanqua*. With its delicate single white blooms and dark green glossy foliage, this beauty is a stand-out in colder climates. It is medium-sized with an upright habit and excellent disease resistance. Blooms in fall. Mature height 5-6'. Zone 6.

PINK SERENADE CAMELLIA – *C. sasanqua*. It has a long lasting show of pink single flowers. The showiness, combined with a strong upright growth habit, makes it a very worthwhile plant for the garden or shrub border. This is one of the earliest sasanquas to start blooming in the fall. Mature height 6-8'. Zone 7.

WINTER'S SNOWMAN CAMELLIA – *C. sasanqua*. 'Winter's Snowman'. This tall columnar form is great for tight spaces. Its white 3" diameter anemone-form flowers are striking in winter and early spring. Foliage is emerald green. Mature 12'. Zone 6.

NEW! WINTER'S STAR CAMELLIA – *C. oleifera* × *C. hiemalis*. A fall blooming evergreen camellia with violet-pink flowers. Upright, vigorous, yet compact, habit reaching 5' in height in maturity. Zone 6.
#3\$19.60

CARYOPTERIS

DARK KNIGHT – *C. x clandonensis*. Compact mounding plant with aromatic foliage and deep blue late summer flowers. Mature size 3' x 4'. Zone 5.

LONGWOOD BLUE – *C. x clandonensis*. Mounded habit with gray-green foliage. Flowers are bluish violet. Mature size 3' x 4'. Zone 5.
#3\$14.80

CEPHALANTHUS

NEW! SUGAR SHACK® BUTTONBUSH – *Cephalanthus occidentalis*. PP26543. Great plant for wet areas or rain gardens. Fragrant, white, button-like flowers in summer produce red fruit for fall interest. Trim in early spring as the flowers are produced on new wood. Mature at 3'-4' wide and tall. Royalty fee \$.50. Zone 4.
#3\$15.10

CHAMAECYPARIS

GOLD MOP CYPRESS – *C. pisifera*. A mounding evergreen with golden thread like foliage. Mature height and width 5-7'. Zone 5.
#3\$14.45

CLETHRA

EINSTEIN™ – *C. alnifolia* 'Novacleein'. PP27590. Fragrant white racemes, sometimes 12" long, are borne on twisted and curled branching, reminiscent of Albert Einstein's unruly coiffure. Extremely hardy. Rounded and compact. Mature at 3'-4' tall and wide. Zone 4.

HUMMINGBIRD – *C. alnifolia*. Compact summer-sweet with dense mounding habit. White flowers are delightfully fragrant in the summer. Plant is shade tolerant. Mature size 3-5' x 3-4'. Zone 3.

RUBY SPICE – *C. alnifolia*. Fragrant, deep-pink flowers bloom in late summer. Dark green foliage. Mature size 3-6' x 3-4'. Zone 3.
#3, 12-15"\$13.95
#3, 15-18"\$15.85
#3, 18-24"\$17.95

CORNUS

EUROPEAN VARIEGATED – *C. alba* 'Argenteo-marginata'. This larger ornamental shrub has year round appeal with its summer display of attractive cream and green variegated foliage and winter display of vibrant red branches. Mature 10'. Zone 3.

BAILEYI RED TWIG DOGWOOD – *C. sericea*. A beautiful red stemmed dogwood with medium green foliage and creamy white flowers followed by blue-black fruit. Winter bark color is burgundy. Mature 9'. Zone 3.

YELLOW TWIG DOGWOOD – *C. sericea* 'Flaviramea'. Bright yellow stems on the younger growth of this bushy shrub are very striking during the winter. Flowers are white followed by white fruit. Mature height 9'. Zone 3.
#7, 3'-4'\$17.50

DEUTZIA

NIKKO – *D. gracilis*. Noted for its showy display of white flowers in April and May, Nikko is dwarf, dense, rounded and spreading. Flower display is best in full sun. Plant in masses for an informal hedge or use as an accent plant or focal point in a mixed bed. Deciduous. 1'-2' x 2'-5'. Zone 5.
#3\$11.95

EUONYMUS

COMPACTA – *E. alatus*. Dwarf Winged Burning Bush. Mounded, broad shrub. Brilliant red leaves in fall. Mature height 10'. Zone 4.

HIBISCUS

BLUE CHIFFON® – *H. syriacus*. PP20574. Large blue powder-puff anemone-like flowers. A strong growing, uniform hibiscus with low seed production. Blooms in summer. Add \$.50 for royalty charge. Mature height 8'-12. Zone 5.

#3\$19.20

NEW! HEAD OVER HEELS® **ADORE** – *H. moscheutos* 'RutHib3'. PPTBS. A petite plant with a burst of color. Burgundy-black foliage and large pink flowers make for an eye-catching display in a container or directly in the garden. 3' tall by 4' wide. Likes full sun. Zone 6.

NEW! HEAD OVER HEELS® **BLUSH** – *H. moscheutos* 'RutHib1'. PPAF. A petite plant with a burst of color. Burgundy-red foliage and large, bright pink flowers make for an eye-catching display in a container or directly in the garden. 3' tall by 4' wide. Likes full sun. Zone 6.

NEW! HEAD OVER HEELS® **PASSION** – *H. moscheutos* 'HibRut2'. PPAF - A petite plant with a burst of color. Burgundy-red foliage and bright pink flowers make for an eye-catching display in a container or in the garden. 3' tall by 4' wide. Likes full sun. Zone 6.
 #3\$12.45

HYDRANGEA

See additional tree form hydrangeas in ornamental tree section

ANNABELLE – *H. arborescens*. Big snowball flowers gradually change from green to pure white. Mature height 3-4'. Zone 4.

SWEET SUMMER – *H. paniculata* 'Bokrathirteen'. PP21778. Loads of flower panicles in a colorful green, mature to white in summer, then shades of pink in the fall. Low maintenance and tolerant of tough growing conditions. Mid-sized. Mature at 4' tall and wide, mounded. Zone 3.
 #5\$26.30

BLUE WAVE – *H. macrophylla*. A vigorous shrub with dark green serrate leaves and large clusters of long blooming lace cap summer flowers. Flowers are rich blue in acidic soils and lilac-pink in alkaline. Mature 3-5'. Zone 5.

NIKKO BLUE – *H. macrophylla*. Large blue or deep lavender flower balls. Prolific bloomer. Mature height 6'. Zone 5.

PINK DIAMOND – *H. paniculata*. Upright rounded habit with an incredibly large flower. Pink buds open to white and gradually turn rich shades of pink. Mature height 6'. Zone 3.

#3\$12.10
 #5\$24.10

NEW! ENDLESS SUMMER® **SUMMER CRUSH**® – *H. macrophylla*. PP30359. Raspberry to purple flowers are dazzling up close and from a distance. Plump blooms are borne on sturdy stems. This is a compact hydrangea, excellent as a container plant or in multiples in the garden. Mature at 3' tall and wide. Zone 5.

ENDLESS SUMMER® **THE ORIGINAL** – *H. macrophylla* 'Bailmer'. PP15298. A mop-head type hydrangea that blooms consistently on both old and new wood, producing 8" diameter flowers all summer. Blooms pink in alkaline soils and blue in acidic soils. Mature height 5'. Zone 4.

ENDLESS SUMMER® **BLUSHING BRIDE**® – *H. macrophylla* 'Blushing Bride'. PP17169. Dark glossy green foliage makes the perfect backdrop for the beautiful, white mopheads that measure up to 6" across. Mature flowers turn pink or blue depending on soil acidity. Repeat bloomer. Mature height 5'. Zone 4.

ENDLESS SUMMER® **BLOOMSTRUCK**® – *H. macrophylla*. PP25566. 'PIIHM-II'. This introduction offers pink, purple or blue flowers depending on soil PH. Reddish purple stems are showy and strong to support the weight of the large flowers. Mature height 3-4' and width 4-5'. Zone 4.

ENDLESS SUMMER® **TWIST-N-SHOUT**® **BIG-LEAF** – *H. macrophylla*. PP20176. 'PIIHM-I'. Sturdy red stems with glossy deep green foliage. Abundant lovely blossoms with lacy centers in pink or blue depending on soil type. Repeat bloomer. Mature height 5'. Zone 4.
 #3\$19.85
 #5\$28.70

BOBO® – *H. paniculata*. PP22782. From Belgium, a prolific bloomer with strong stems that support the large white flowers. Add \$.50 for royalty charge. Mature height 2.5-3' and width 3-4'. Zone 3.

FIRE LIGHT® – *H. paniculata*. PP25135. Thick, sturdy stems with upright panicles packed with pure white to pink florets that transform to a rich pomegranate-red. Extremely hardy. Mature height 4.5'-6'. Zone 3. Add \$.50 for royalty charge.

INVINCIBELLE WEE WHITE® – *H. arborescens*. PPAF. Abundant flower heads that flush pink, aging to white then green. Strong stems on this tiny, tidy hydrangea are strong and resist flopping. Good for cutting. Summer rebloomer. Mature at 1'-2 1/2' tall and wide. Zone 3. Royalty charge \$.50

LIMELIGHT™ – *H. paniculata*. PP12874. An extraordinary hydrangea with bright, beautiful lime-green flowers. This plant adds much needed color in late summer landscape. Add \$.50 for royalty charge. Mature height 6-8'. Zone 3.

LITTLE LIME® – *H. paniculata*. PP22330. PPAF. A dwarf form of the ever popular 'Limelight' hydrangea. At one third the size of traditional hardy hydrangeas, this variety fits well into any landscape. Add \$.50 for royalty charge. Mature height 3-5'. Zone 3.

LITTLE QUICK FIRE® – *H. paniculata*. PP25136. Add \$.50 for royalty. White flowers emerge in the summer, earlier than other hydrangea selections, then turn to shades of pink. This dwarf shrub is drought tolerant and a good choice for a mixed border or showy specimen plant. Mature at 3' - 5'. Zone 3.

PINKY WINKY™ – *H. paniculata*. PP16166. Large, white flower panicles open in mid-to-late summer. Florets on the base of the panicles begin to turn pink as the flower continues to grow, producing new white florets at the tip. Flowers are a beautiful two-tone color that can grow to 16 inches in length. Add \$.50 for royalty charge. Mature height 6-8'. Zone 3.

WEDDING GOWN – *H. macrophylla* "Dancing Snow". PP21052. An early blooming white hydrangea that starts out like a lace cap and then flowers like a mophead. It reblooms until fall and flowers are not impacted by PH so they don't turn pink or blue. Compact mounding habit. Mature height and width 3' x 5'. Zone 5.

ALICE – *H. quercifolia*. Large, oak-like foliage with burgundy fall color. Flowers are large 12" white panicles. Mature height 6-10'. Zone 5.

MUNCHKIN – *H. quercifolia*. N.A. #73936. A seedling of Sike's Dwarf, this National Arboretum introduction is more compact and holds up well following heavy rains. Flowers open white then fade to pale pink. Mature size is 3' tall x 4-5' wide. Zone 5.

PEE WEE – *H. quercifolia*. A smaller oak leaf hydrangea with white flowers that fade to pink. Mature height 3-4' tall x 3-4' wide. Zone 5.

RUBY SLIPPERS – *H. quercifolia*. N.A. #74836. A truly compact oakleaf hydrangea, 'Ruby Slippers' is particularly attractive for small residential landscapes. Flowers open white, but quickly turn pale pink and depend to rose. Foliage is dark green in summer and mahogany-red in fall. Zone 5.

SIKES DWARF – *H. quercifolia*. A dwarf 'Oakleaf' hydrangea with an abundance of white flower heads in summer. Mature height 3-4'. Zone 5.
#3\$16.25

HYPERICUM

BLUE VELVET™- ST. JOHN'S WORT – *H. kalmianum*. Attractive blue-green foliage highlights mid-summer yellow flowers. A cooling element for a hot landscape. Use this selection in mass plantings, as foundation accent plantings or as a contrast planting in the mixed border. Garden height 2' -3'. Zone 4.
#3\$16.25

ILEX CRENATA

CRENATA COMPACTA – *I. crenata*. Compact, globose form. Lustrous dark green, obovate leaves. Mature height 5'. Zone 5.

GREEN LUSTRE – *I. crenata*. Broad, open shrub form. Dark green, elliptic foliage. Mature height 4'. Zone 5.

HELLERI – *I. crenata*. Low, dense mounding plant. Very small, dark green leaves. Mature height 4'. Zone 5.

HOOGENDORN – *I. crenata*. Habit is compact and mounding with small, elongated, dark green leaves. Mature height 4'. Zone 5.

SCHWOEBEL'S COMPACTA – *I. crenata*. Dwarf, low, spreading habit. Medium green foliage. Very hardy. Mature height 4'. Zone 5.

SOFT TOUCH – *I. crenata*. Just as the name says – it has a pleasing soft texture! Small, compact globe form with lustrous, dark green foliage. Mature size 2' x 3'. Zone 6.

ILEX VERTICILLATA

SOUTHERN GENTLEMAN – *I. verticillata*. Southern Gentleman will produce an abundance of small flowers but no fruit. Habit is upright and rounded. Male pollinator for ‘Winter Red’. Mature 8’ x 8’. Zone 3.

WINTER RED® – *I. verticillata*. Habit is multi-stemmed and rounded with lustrous, dark green leaves. Winter fruit is an intense, bright red and maintains its color throughout the winter season. Male pollination required. Mature 9’ x 8’. Zone 4.

#3, 15-18”	\$14.40
#3, 18-24”	\$17.05

ITEA

HENRY’S GARNET – *I. virginica*. White, lightly fragrant flowers cover this plant in early summer. Fall color is reddish-purple. Mature size 5’ x 8’. Zone 5.

LITTLE HENRY® – *I. virginica*. PP10988. Dwarf Sweetpire. Add \$.50 royalty. A low mounding, compact habit with sweetly scented, pure white flowers in early summer. Fall color is a beautiful wildfire, orange-red. Mature size 2’ x 3’. Zone 5.

#3, 15-18”	\$14.65
#3, 18-24”	\$17.15

JUNIPERUS

JUNIPER ‘GOLD STAR’ – *J. chinensis* ‘Gold Star’. Gold Star is an evergreen shrub best known for its beautiful golden foliage which is brightest in summer. An excellent choice for accent or foundation plantings which also works well on banks or inclines. Mature 6’ x 3’. Zone 4.

JUNIPER ‘GREEN SARGENT’ – *J. chinensis* ‘Green Sargent’. Fast growing evergreen that is heavily branched and adorned with emerald green foliage. Its low growth habits make it great for mass plantings and erosion control. Mature size 6’ x 3’. Zone 4.

JUNIPER ‘HETZII COLUMNAR’ – *J. chinensis* ‘Hetzii columnar’. An upright juniper, densely branched and pyramidal in shape, which makes a perfect specimen or screening plant. Bluish foliage throughout the year gives this juniper a delicate feel. Mature size 6’ x 8’. Zone 5.

JUNIPER ‘OLD GOLD’ – *J. chinensis* ‘Old Gold’. A hardy juniper with dense, upright branching. Foliage

emerges golden and ages to a soft emerald. Mature size 5’ x 4’. Zone 4.

JUNIPER ‘ROBUSTA GREEN’ – *J. chinensis* ‘Robusta Green’. An upright juniper with bright green foliage throughout the year. Irregular columnar growth habit makes for an ideal accent or hedge planting. Mature size 3’ x 15’. Zone 5.

JUNIPER ‘SEA GREEN’ – *J. chinensis* ‘Sea Green’. This rapid growing juniper forms a natural vase shape with bright green finely textured foliage. Makes a great border or small screen. Mature size 8’ x 6’. Zone 4.

SEA SPRAY – *J. chinensis*. A fast growing evergreen with blue green foliage and trailing habit. Best used as groundcover. Mature height 2’ and width 4-6’. Zone 3.

JUNIPER ‘TORULOSA’ – *J. chinensis* ‘Torulosa’. A fast growing upright evergreen with emerald green foliage which twists uniquely as it ages. Torulosa makes an excellent hedge, topiary or screen. Mature size 10’ x 15’. Zone 4.

JUNIPER ‘BAR HARBOR’ – *J. chinensis* ‘Bar Harbor’. Prostrate growth habit makes Bar Harbor an excellent groundcover. High tolerance to salt spray. Foliage is a lush blue-green which turns a pleasant shade of purple during winter. Mature size 6-10” x 6-8’. Zone 4.

JUNIPER ‘BLUE RUG’ – *J. horizontalis* ‘Wiltonii’. Similar to Bar Harbor with a tighter growth habit. Foliage is dense and blue in color. Prostrate form, rarely more than 8” tall. Excellent for bank plantings. Mature 8” x 6’. Zone 4.

JUNIPER PROCUMBENS ‘NANA’ – *J. procumbens* ‘Nana’. Low growing juniper with thick branches and yellow green foliage. Great for groundcover or for cascading over walls. Mature size 12” x 6’. Zone 4.

JUNIPER ‘GREY OWL’ – *J. virginiana* ‘Grey Owl’. A standout in the landscape with blue-grey foliage. Densely spreading branches are covered generously with berries. An excellent tall groundcover or background shrub. Mature size 6’ x 3’. Zone 4.

#3 (Prostrate)	\$12.70
#3 (Upright – Torulosa, Hetzi, Robusta Green)	\$13.95

KALMIA

BULLSEYE – *K. latifolia*. Open flowers have white throats with a broad band of cinnamon-purple around the inside and white edges. New growth is reddish-bronze. Mature size 6' x 6'. Zone 5.

OLYMPIC FIRE – *K. latifolia*. Red buds open to large pink blooms. Foliage is heavily-textured and glossy with a wavy leaf margin. Seedling of 'Ostbo Red'. Mature size 6' x 6'. Zone 5.

- #3, 12-15" \$18.75
- #3, 15-18" \$22.20
- #3, 18-24" \$24.25

LEUCOTHOE

COAST LEUCOTHOE – *L. axillaris*. Low, broad habit with spreading branches. Reddish new foliage turns a leathery dark green. Mature size 4' x 6'. Zone 5.

- #3, 15-18" \$16.85
- #3, 18-21" \$18.85

MICROBIOTA

SIBERIAN CYPRESS – *M. decussata*. A low growing, shrubby and spreading evergreen groundcover. Feathery foliage is soft to the touch and scale-like in appearance. Prostrate growth habit 8"-10" x 3'-12'. Zone 3.

- #3 \$16.40

MYRICA

NORTHERN BAYBERRY – *M. pensylvanica*. Salt tolerant, semi-evergreen shrub with glossy, aromatic foliage and waxy blue-gray berries. Mature height 6-9'. Zone 4.

SALIX

ARCTIC BLUE WILLOW – *S. purpurea* 'Nana'. Dense, rounded form. Leaves are blue-green. Mature height 4' x 4'. Zone 4.

HAKURO NISHIKI WILLOW – *S. integra* 'Hakuro Nishiki'. A Japanese dappled willow noted for its beautifully variegated pink-white-green foliage. Mature height 4' x 4'. Zone 4. (Tree form available on p. 48)

#7 shrub\$30.40

SPIRAEA

GLOW GIRL® – *S. betulifolia* 'Tor Gold'. PPAF. Pink buds open to pure white blooms over lemon-lime foliage in spring. Foliage holds color well, resists burning in summer and evolves to a rich burgundy in autumn. Mature height 3'- 4'. Zone 3.

ANTHONY WATERER – *S. x bumalda*. A dense mounding spiraea that produces deep rose-red flowers in June. Mature height 3'. Zone 4.

GOLDFLAME – *S. x bumalda*. Pink flowers in summer. Interesting foliage changing from russet orange to golden-green. Mature height 3'. Zone 4.

DOUBLE PLAY DOOZIE™ – *S. x 'NCSX2'*. PPAF. The first sterile reblooming spiraea, this plant starts in spring with bronze red foliage that turns bright green in the summer. The flowers are hot pink and will continue until fall. Mature size 2-3' x 2-3'. Zone 3. Royalty charge \$.50

DOUBLE PLAY® GOLD – *S. japonica*. PP21615. Royalty charge \$.50. A brilliant display of color. The foliage is golden and in summer is topped with pure pink flowers. This selection keeps its compact and mounded habit with very little maintenance. Attracts hummingbirds and resists deer. Reaches a height of 1½' – 2'. Zone 3.

GOLDMOUND – *S. japonica*. Bright gold foliage, pink flowers and a low mounding form. Mature height 2'. Zone 4.

LITTLE PRINCESS – *S. japonica*. Deep pink flowers all summer. Compact habit. Mature height 2½'. Zone 4.

DOUBLE PLAY® CANDY CORN® – *S. japonica*. PP28313. Quite a colorful display! Foliage emerges as candy apple red in early spring becoming pineapple yellow. New growth is a nice contrast in orange-red. Late spring blooms are dark purple. Mature at 1½' - 2' tall and wide. Zone 4. Royalty charge \$.50

MAGIC CARPET – *S. japonica* 'Walbura'. A compact spiraea with vibrant foliage year round. New growth is red changing to gold at maturity and holds color through summer. Deep pink flowers. Mature height 2' and width 2'. Zone 4.

NEON FLASH – *S. x bumalda*. Vivid red flowers and rich new growth. Mature height 3'. Zone 4.

OGON – *S. thumbergii*. The fine feathery foliage of this spiraea is striking. The small white flowers emerge early and are followed by gold foliage which turns bright green at maturity. Fall color is bright orange. The branches arch and the habit is willowy. Mature height and width if 5'. Zone 5.

SNOWMOUND – *S. nipponica*. Abundant white flowers. Delicate foliage is blue-green in color. Mature height 5'. Zone 3.

- #3, 15-18"\$13.65
- #3, 18-24"\$14.95

SYMPHORICARPOS

JAPANESE SNOWBERRY – *S. albus*. An easily grown, shade tolerant deciduous shrub. Broad, round habit is densely fine and twiggy. Leaves are bluish-green and white berries appear in the fall and persist into winter. Mature 6' x 6'. Zone 3.

- #7, 30-36"\$24.95

SYRINGA

PALIBIN DWARF KOREAN LILAC – *S. meyeri* 'Palibin'. A neat and spreading lilac selection. Flowers are fragrant and from reddish-purple buds open to pale lilac. A fine addition to a shrub border or plant several for a low hedge. Mature at 6' x 7'. Zone 3.

MISS KIM – *S. patula*. Dwarf, compact habit with attractive dark green foliage. Pale purple flower buds open to lavender blue. Vigorous. Mature size 6' x 5'. Zone 3.

- #3, 12-15"\$14.95
- #3, 15-18"\$17.90
- #3, 18-24"\$21.40

BLOOMERANG® DARK PURPLE – *S. x 'SMSJBP7'*. PP26549. Large, rounded purple inflorescences. Very showy in spring and continues to be a show stopper with fragrant blooms from mid-summer until frost. Exceptional vigor. Mature height 4'- 6'. Zone 3. Add \$.50 for royalty.

- #3\$17.90

Ivory Silk Japanese Tree Lilac can be found on page 49

THUJA

GREEN GIANT ARBORVITAE – *thuja standishii x plicata*. A vigorous fast growing pyramidal evergreen. Mature height 60' and width 12-15'. Zone 5.

- #3\$14.05

VIBURNUM

CHICAGO LUSTRE® ARROWWOOD – *V. dentatum* 'Synnestvedt'. This variety has upright-rounded habit with glossy dark green foliage. White flowers in mid-late June are followed by ornamental clusters of blue-black fruit in fall. Mature 10-12' x 8-10' in 10 years. Zone 5.

- #7, 24-30"\$26.50
- #7, 30-36"\$28.20

NEW! BLUE MUFFIN® – *V. dentatum Blue Muffin*®. A tall, upright shrub, which makes a nice foundation focus or planted in masses as a hedge or screen. For cross-pollination to produce beautiful blue berries plant a companion Viburnum variety such as Chicago Lustre. Mature at 5' – 7' tall and wide. Royalty charge \$.50. Zone 3.

- #3\$16.70
- #7\$26.50

BRANDYWINE™ – *V. nudum*. Royalty charge \$.50. Most appreciated for its magnificent berry set. White spring flowers produce a stunning display of pink and blue fruit in the fall. Does not require a pollinator for fruit set. Fall foliage is an attractive wine-red. Attracts birds to the garden and resists deer. Mature at 6'. Zone 5.

- #3, 15-18"\$16.70

VITEX

BLUE DIDDLEY® CHASTETREE – *V. agnus-castus*. PP26614. This compact vitex is low maintenance and will attract butterflies during the heat of summer when it flowers. Fragrant. Mature height is 3-5'. PW Royalty charge \$.50. Zone 5.

- #3\$12.85

WEIGELA

FINE WINE® – *W. florida* 'Bramwell'. PP18513. The deep burgundy foliage stays dark all season on this pink flowering shrub. The habit is more rounded and compact than Wine & Roses®. Mature height 2-4' x 2-3' width. Royalty charge \$.50. Zone 4.

SPILLED WINE® – *W. florida* 'Bokraspiwi'. PP23781. Dark purple foliage with wavy edges keeps its color all season. Flowers are magenta. Compact habit is its added feature. Mature height 2' x 3' width. Royalty charge \$.50. Zone 4.

SONIC BLOOM® PEARL – *W. florida*. PP24585. Royalty charge \$.50. A sturdy reblooming weigela with white flowers that turn pink. Continues to bloom without deadheading until frost. Attracts hummingbirds. Mature at 5'. Zone 5.

SONIC BLOOM® PINK – *W. florida*. PP24572. Royalty charge \$.50. Pink flowers emerge in May from hot pink buds. Reblooms without deadheading until frost. Attracts hummingbirds and resists deer. Mature at 5'. Zone 5.

WINE AND ROSES® – *W. florida*. PP10772. Royalty charge \$.50. Intense rosy-pink colored flowers jump against the dark glossy foliage. Leaf color intensifies to near black in mid-summer. Mature height 5'. Zone 4.

- #3\$15.70

Roses are one of America's favorite garden plants and are a symbol of beauty everywhere. Roses have come a long way in the past twenty years and Knock Out® Roses are just a part of this change. Breeders now seek disease resistance, fragrance, reblooming and low maintenance. We test new varieties every year and select the best of Star Roses, David Austin® and Weeks to offer to our customers reliable and unique varieties.

- **DAVID AUSTIN® ENGLISH ROSES** – They are not like any other roses. They quickly form magnificent, fragrant shrubs and climbers that make great impact in the garden. Their large, fragrant blooms have an old world charm and allure that attracts a passionate following.
- **DRIFT® ROSES** – Drift® roses are the end result of a cross between full size groundcover roses and miniatures. From the cross they inherited disease resistance and winter hardiness coupled with a low growing size and repeat blooming.
- **LANDSCAPE ROSES** – Landscape shrub roses offer repeat flowering without excessive maintenance and provide a wide range of growth habits to fit almost every need. Whether you are looking for a colorful hedge or a vibrant accent, these easy to grow roses are a perfect choice.
- **RUGOSA ROSES** – This is one of toughest rose species in terms of environmental stresses and disease pressure. Rugosas are continuous bloomers and have large hips (fruits) in late fall into winter. One of the first shrubs to be found close to the seashore.
- **HYBRID TEA ROSES** – This distinguished class of roses has been popular with gardeners for generations. The blooms develop singly on long stems and the buds are often as elegant as the open blooms, making them perfect for cut flowers. Generally, hybrid teas have a major bloom followed by a minor bloom later in the season.
- **GRANDIFLORA ROSES** – Grandifloras are crosses between the timeless hybrid teas and the resilient Floribunda roses. The result is a rose with the vigor and blooming ability of a Floribunda with the beauty and long stems of a hybrid tea.
- **CLIMBING ROSES** – Our selection of climbers includes the best and toughest roses to plant on a trellis, fence or wherever a vine effect is desired.
- **FLORIBUNDA ROSES** – Floribundas are well known for their repeat blooms and beautiful flower clusters. Overall, Floribundas are more tolerant to heat, drought, pest and diseases.
- **SUNBLAZE® MINIATURE** – A collection of miniature roses that have all of the beauty of a reblooming rose.

DAVID AUSTIN® ROSES

BROTHER CADFAEL™

These large clear pink flowers resemble peonies and they have a strong traditional rose fragrance. The habit is bushy and full and it has good disease resistance.

BOSCOBEL™

PP25064. Upward facing blooms are composed of perfectly formed, rich salmon rosettes. Very strong and complex myrrh fragrance. Repeat flowering. Very healthy with good disease resistance. Mature at 3' tall x 2.5' wide. Upright and bushy. Zone 5.

CARDING MILL®

Beautiful mixed shades of apricot, pink and yellow blend to give this double flower an overall apricot color. Blooms have a myrrh fragrance. The plant has a nice bushy full habit. Zone 5.

CHARLOTTE™

Beautiful cup shaped blooms are soft yellow and reblooming. Tea rose fragrance. Zone 5.

CLAIRE AUSTIN CLIMBER®

PP19465. This fine white rose bears pleasing cupped buds of pale lemon opening to large, creamy-white blooms with English Musk delicacy. The strong fragrance, based on myrrh with dashes of meadowsweet, vanilla and heliotrope wafts from the elegant arching shrub. This strong and healthy climber grows to 8 ft. Zone 5.

NEW! CROWN PRINCESS MARGARETA™ CLIMBER

PP13484. A climbing English rose with neatly arranged apricot-orange rosettes, bearing a strong fruity fragrance. Habit is well rounded with slightly arching growth. An ideal choice for shady gardens. Repeat flowering. Mature at 5' tall x 5' wide. Zone 5.

DARCEY BUSSELL™

PP18717. Rich crimson rosettes develop a tinge of mauve on this freely flowering beauty. The graceful shrubby habit makes this ideal for growing in large pots or containers as well as in beds and borders. It has a pleasing fruity fragrance. Zone 5.

DESDEMONA

PPAF. Deceptive peachy pink buds open to reveal white blooms, with a lovely old rose and almond

blossom fragrance. Named for the tragic heroine in Shakespeare's Othello. Chalice shaped blooms that have a strong and heady perfume fragrance. Zone 5.

NEW! EMILY BRONTË

A shrub rose with beautiful soft pink flowers with a hint of apricot in center. The habit is upright and disease resistance is good. Strong tea rose fragrance. Mature at 4' tall x 3½' wide. Zone 5.

GERTRUDE JEKYLL®

The quintessential old rose scent from the large rosette-shaped flowers. The rich, glowing pink blooms benefit from summer pruning, especially in hotter areas. Voted England's Favorite Rose, it is superb as a shrub or a climber. Very good winter hardiness. Winner of the James Mason award for fragrance. Zone 4.

HARLOW CARR®

These perfectly formed double medium sized pink flowers have a strong fragrance that smell like an old time rose. It has a bushy upright habit and is a good repeat bloomer. Good disease resistance. Zone 5.

IMOGEN

Natural charm! A sturdy and upright shrub rose with soft, lemon yellow blooms that, over time, become an almost cream color carrying a light fragrance reminiscent of fresh apple. Blooms are distinctive, pretty and frilled. Mature at 4' tall x 3' wide. Zone 5.

LADY OF SHALOTT CLIMBER™

PP22171. Rich orange-red buds open to salmon pink double blooms. Robust, hardy and highly disease resistant, this forms a large, bushy shrub with arching stems. Ideal even for the inexperienced gardener. This rose emits a pleasant warm tea fragrance with hints of spice. Zone 5.

LICHFIELD ANGEL™

PP18702. Large, creamy apricot-white, dome-shaped rosettes freely adorn this shapely shrub. Good disease resistance and tolerant of poorer soils. Moderately fragrant and repeat flowering. Mature at 4' tall x 3' wide. Zone 5.

MOLINEUX™

PP9524. RHS Award of Garden Merit. A healthy variety, which produces rich yellow blooms with exceptional freedom and continuity. There is a delicious musky tea rose scent. Good for disease resistance, repeat flowering, and ideal for poor soil. Zone 6.

MUNSTEAD WOOD™

PP19876. Sumptuous blooms are deep velvety crimson in color. Exceptional old rose fragrance with fruity notes of blackberry, blueberry and damson. Repeat flowering. A good selection for containers. Mature at 3' tall x 2.5' wide. Zone 5.

OLIVIA ROSE AUSTIN

PPAF. Named after the daughter of David Austin Jr, this rose has beautiful soft pink rosettes opening to three and one half inches across. Vigorous, yet compact and a repeat bloomer. Strong, fruity fragrance. One of the most disease-resistant rose offered by David Austin. Zone 5.

POET'S WIFE

PPAF. Beautifully formed, cupped flowers of strong, striking yellow. Rich, fruity fragrance, with notes of lemon. Low, naturally rounded, bushy growth. Ideal for pots and containers. Zone 5.

QUEEN OF SWEDEN™

PP17150. Elegant! Charming, cup-shaped flowers are soft apricot pink in color with and a classic myrrh fragrance. Exceptionally healthy with good disease resistance. Repeat bloomer. Mature at 4' tall x 2.5' wide. Upright. Zone 5.

ROALD DAHL

Quite charismatic! Cupped rosettes are a beautiful peach color and have a lovely tea fragrance. Delicate in appearance yet robust enough to withstand inclement weather. Free-flowering, rounded and bushy with few thorns. Very healthy. Mature at 4' tall and wide. Zone 5.

TEASING GEORGIA CLIMBER™

A delicate beauty with exquisitely cupped rosettes of rich yellow fading into pale yellow towards the edges. Winner of the Henry Edland Medal for its fine tea fragrance. Strong, graceful growth can be trained as a short climber; as a shrub summer pruning will keep it compact. Good disease resistance; very hardy. Zone 5.

TESS OF THE D'URBERVILLES CLIMBER®

Large fragrant flowers of bright crimson with outer petals that eventually reflex back. The growth of this hardy rose is vigorous, forming a rounded shrub that may benefit from some summer pruning. It has a lovely old rose fragrance and may also be grown as a short climbing rose. Zone 5.

THE ALNWICK ROSE

Large, deeply cupped flowers of soft pink open into full-petaled, shallow cups with paler pink edges. There is a hint of raspberry in the old rose fragrance. This blooms freely until late in the year and remains compact. Zone 5.

THE ANCIENT MARINER

PPAF. Impressive and dramatic. Masses of very large and fragrant pink blooms are present from June until the first frosts. Excellent disease resistance. Repeat bloomer. Mature at 5' tall and 3' wide. Zone 5.

THE LADY GARDENER

Rosette shaped apricot flowers. An excellent shrub in the garden and will rebloom quickly. Tea rose fragrance. Zone 5.

NEW! TRANQUILLITY™

PP25063. An English shrub rose noted for the perfection of its pure white, beautifully rounded rosette blooms with a light apple fragrance. Very attractive floriferous display and almost thornless. A very healthy variety with vigorous growth, good disease resistance and tolerant of poor soils. Repeat flowering. Mature size is 4' tall x 3' wide. Zone 5.

NEW! VANESSA BELL™

An English shrub rose named for artist, designer and the sister of Virginia Woolf. Pale yellow flowers pale further at the edges to white, each having a yellow eye. Buds are pink tinged and open to medium sized cups held in large clusters. Refreshing fragrance of green tea with hints of lemon and honey. Habit is bushy and upright. 4' tall x 3' wide. Zone 5.

WINCHESTER CATHEDRAL™

A beautiful white version of 'Mary Rose'. Masses of white flowers held on a bushy shrub bloom at regular intervals throughout the season. The strong old rose fragrance has delicious hints of honey and almond blossom. Particularly winter hardy. Zone 4.

#3\$21.50

KNOCK OUT® ROSES

NEW! THE PETITE KNOCK OUT® ROSE

Brings a new level of versatility to the rose market! A miniature version of the original Knock Out® with the same non-fading, bright red flowers and dark and

shiny green foliage. Easily maintained and extremely black spot resistant. Great for containers. Mature plants reach 18" in height. Zone 5.

#2 Deco\$15.50

THE BLUSHING KNOCK OUT® ROSE

PP14700. This variety has a light pink bloom that fades to a soft and subtle pink as the season progresses. With similar flowers to the original Knock Out® rose, this shrub rose is a versatile addition to any landscape. Zone 5.

THE CORAL KNOCK OUT® ROSE

PP19803. A new Knock Out® for the mid-Atlantic and South, this rose was formerly known as Carefree Celebration. The new foliage is bronze red and the unique coral color is even stronger in hot climates. It maintains an upright to rounded habit and blooms from spring through fall. Zone 5.

THE DOUBLE KNOCK OUT® ROSE

PP16202. With full cherry-red double flowers similar to that of a classic rose, this variety comes from the same cross that produced the original Knock Out®. It has the same black spot resistance as the famous original but with the added beauty of a double flower and a slightly better winter hardiness. Zone 5.

THE KNOCK OUT® ROSE

PP11836. The original member of The Knock Out® Family, this shrub rose has a bloom cycle that produces cherry-red/hot-pink blooms up until frost. With superior disease resistance, self cleaning and little to no maintenance this rose suits every garden and landscape. Zone 5.

THE PEACHY KNOCK OUT® ROSE

PP25628. This new Knock Out® is for the mid-Atlantic and Northern markets. Pink flowers with yellow center and the overall color effect is peach. The color is more intense with the cooler temperatures. Zone 4.

THE PINK DOUBLE KNOCK OUT® ROSE

PP18507. Bright bubble gum pink classic shaped flowers adorn this pink version of The Double Knock Out®. Superior drought tolerance and flowers from early spring to frost make this rose a show stopper. Zone 5.

THE PINK KNOCK OUT® ROSE

PP15070. Just like the original with its single petals and easy maintenance but in a beautiful shade of bright

pink! Black spot resistance, self cleaning and drought tolerance, just like the other members of the family, make this an excellent rose for any garden. Zone 5.

THE SUNNY KNOCK OUT® ROSE

PP18562. This rose has bright yellow flowers that fade quickly to a lovely pastel cream color. Yellow color stays longer in cooler weather and this rose has a more upright habit. Zone 5.

THE WHITE KNOCK OUT® ROSE

PP20273. An excellent shrub rose which stands out with its pure white blooms and very dark green foliage. It maintains a compact habit, and blooms from spring through fall. Zone 4.

#3\$13.85

DRIFT® GROUND COVER ROSES

CORAL DRIFT®

PP19148. Vibrant, bright, coral-orange blooms cover this small mounding shrub from mid-spring to mid-fall. Winter hardy, heat and drought tolerant. Good disease resistance. Compact, groundcover. Zone 4.

PEACH DRIFT®

PP18542. Soft and subtle peach blooms cover this plant from mid-spring to the first hard freeze. As one of the most floriferous plants, Peach Drift® will pair well with any perennials in the landscape. Zone 5.

PINK DRIFT®

PP18874. Pink Drift® has deep pink flowers with a soft faded center that bloom in abundance throughout the entire growing season. The disease resistance is excellent. Zone 5.

RED DRIFT®

PP17877. Delicate red flowers with excellent disease resistance are what sets this Drift® rose apart from the rest. Perfect for border plantings or anywhere it is allowed to drape naturally. Zone 5.

SWEET DRIFT®

PP21612. Abundant clear pink double flowers that continuously bloom throughout the growing season make this rose perfect for pathways, hillsides or along the front of any landscape bed. Zone 5.

WHITE DRIFT®

PPAF. The newest addition to the Drift® series, this pure white double flower resembles a miniature rose flower. Good disease resistance and low groundcover habit. Zone 5.

#3 Drift Pot \$13.85

LANDSCAPE SHRUB ROSES

BONICA®

This award winning rose started the Meidiland® family. Beautiful pastel pink flowers adorn this tough and vigorous shrub from spring to mid-fall. With orange-red seed hips in winter this rose has beauty year-round. Zone 5.

CAREFREE SPIRIT™

PP20175. A descendant of Carefree Delight™, Carefree Spirit™ has better disease resistance and a beautiful deep cherry-red with white center flowers. Zone 5.

CAREFREE WONDER™

PP13063. Excellent disease resistance and winter hardiness are what this rose is known for. Splendid pink flowers that reoccur all season long with minimal upkeep are sure to please. Zone 5.

FIRE MEIDILAND®

PP11583. An excellent rose for mass plantings and erosion control. Brightly colored and disease resistant, it is ideal for slopes and banks as it hugs the ground with weed-smothering vigor. Zone 5.

HOME RUN®

PP18552. Flame red off-spring of The Knock Out®, Home Run® has the same superior disease resistance of its parent and is completely resistant to powdery mildew. Quick to flower and with continuous color. Zone 5.

ICECAP™

PP26790. PPTBS. Pure white flowers on a compact, rounded shrub. It is a re-bloomer and has shown good disease resistance. Zone 5.

LEMON FIZZ KOLORSCAPE®

From Kordes, this is a beautiful, rich bright yellow shrub rose. Flower color has real staying power from bud to petal drop. Rarely needs pruning. Dark green foliage makes a perfect backdrop for this stunning yellow rose. Compact. Zone 5.

1-800-323-3008

LIMONCELLO™

PP21532. Continuous blooms of light yellow flowers cover this vigorous growing shrub rose. Zone 5.

SEA FOAM

This shrub's disease resistance, winter hardiness and recurrent white blooms make it an excellent choice for the landscape. Like the Meidiland® roses, it is virtually maintenance free. Zone 5.

TEQUILA™

PP16342. Brightly colored apricot-orange blooms throughout the season really make this rose stand out in the landscape. Tequila™ can be used as a stand-alone specimen plant or as a beautiful hedge. Zone 5.

TEQUILA GOLD®

PP18657. This rose is a mutation of Tequila™, one of our most popular landscape roses. It produces a symphony of bright color non-stop through the season. The golden color will shine as a bright spot in any modern garden. Zone 5.

TEQUILA SUPREME®

PP21271. Copper and ochre color and unique scalloped petals make this rose very attractive. Flowering from spring to frost, it has good disease resistance and adapts well to hot and humid conditions. Zone 5.

THE FAIRY

Double light pink flowers that blossom profusely throughout the plant from summer to frost. Interesting dark fern-like foliage offers striking contrast to your landscape. Zone 5.

#3 \$ 14.80

RUGOSA ROSES

BLANC DOUBLE DE COUBERT

Pure white flowers with a wonderful licorice fragrance set this hardy Rugosa apart from the rest. This rose is also shade tolerant and a repeat bloomer. Zone 5.

FRAU DAGMAR HARTOPP

Light pink flowers that bloom all summer long with excellent disease resistance and good drought tolerance. Yellow-orange foliage and red hips add wonderful fall appeal. Zone 5.

ROSA RUGOSA

Rose red flowers cover this extremely tough rose from summer to late fall. Tolerant of salty areas, poor soil and even shade makes this the rose for tough growing conditions. Zone 5.

ROSA RUGOSA ALBA

Its blossoms are referred to as the "whitest of the white" by many and they repeat all summer long. Very fragrant flowers are followed by large orange hips in the fall. Zone 5.

RASPBERRY RUGOSTAR®

PP15937. Deep pink flowers with a yellow throat are elegant. This rugosa is resistant to leaf spot and mildew and has a low habit. Flowers heavily in spring and will rebloom in summer and fall. Zone 5.

TOPAZ JEWEL

PP6793. Beautiful semi-double pale yellow flowers on a rugosa! Slight fruity fragrance. Habit is wider than tall. Zone 4.

#3 \$ 14.80

HYBRID TEA AND GRANDIFLORA ROSES

APRICOT CANDY™

PP21284. A hybrid tea whose color can stand up to the heat without fading. The ruffled edged petals with a soft apricot color contrast nicely with the soft green foliage. Zone 5.

BARBRA STREISAND

Sensuous lavender blooms edged with deep magenta. The foliage is a glossy deep green. With its strong sweet scent, Barbra Streisand makes a great cut rose as well. Zone 6.

THE BEST KEPT SECRET™

PP26411. This compact plant produces exhibition-like white flowers with pink edges. With a strong citrus fragrance, this rose is a good replacement for Secret. Grown on its own roots. Zone 6.

BLISS PARFUMA®

PPAF. A delicate pale pink rose with an apricot center. It blooms throughout the season and is very disease resistant. Kordes introduction. Mildly fragrant. Zone 5.

BLUE GIRL

In the realm of lavender roses this girl is actually closer to the unattainable goal of the “true blue” rose than most others. Nice, fruity fragrance and long stems make it perfect for cutting. Zone 5.

BRANDY™

Huge blooms and robust fragrance with thick stems perfect for cutting are what you will remember most about this golden-bronze hybrid tea. Zone 5.

CHERRY PARFAIT™

PP12802. This Grandiflora has white petals with a broad red edge that holds nicely in the heat. Dark foliage makes a striking contrast to the bicolor flowers that bloom all season long. Zone 5.

CHRIS EVERT

Well-formed blossoms on this hybrid tea open in tones of orange and yellow and finish with a scarlet blush. New foliage is a deep red and foliage is lush and green. A tidy rose with a moderate, fruity fragrance. Medium, upright. Zone 5.

CHRYSLER IMPERIAL

A perfect example of what a hybrid tea should be, high-centered, velvety red, strong scented and with a great repeat bloom. Zone 5.

DICK CLARK™

PPAF. Displays ever-changing flowers which unfold as swirls of cream, edged with vibrant cherry pink; age to burgundy with sun intensity, finally finish deep red. Cinnamon spice fragrance; sturdy long stems. Performs best in the Midwest. Zone 6.

DREAM COME TRUE™

This Grandiflora has something for everyone. The catchy orange-red colors will lure even non-rose lovers, while its toughness will satisfy even the most demanding gardener. The bi-tones hold well when cut, and the dark green leaves are much more resistant to diseases than most of the other roses in its class. Zone 5.

NEW! ENCHANTED PEACE™

PPAF. A 2021 Star Roses introduction, this is a seedling of Love and Peace and will replace that variety. The blooms open yellow suffused with orange near the petal edges, then turn yellow with pink. Glossy green foliage and an abundance of lovely fragrant blooms cover this upright shrub. Good choice for a container. 5' tall x 2-3' wide. Zone 5.

ETERNAL FLAME™

PP18918. Soft shades of yellow in the flower, strong citrus scent, and long stems makes this hybrid tea a must have for the cutting garden. Also offers above average disease resistance. Zone 5.

FRAGRANT CLOUD

This tea rose has been in the market for years primarily because of the intense fragrance. The bright orange red flowers continue to bloom and are stunning on a plant that has shiny green foliage. Very fragrant. Zone 5.

FRANCIS MEILLAND™

PP19970. Tall with very large blooms, good exhibition form and strong fragrance. It was a multiple award winner in Europe for both disease resistance and esthetics. The first hybrid tea rose to win the prestigious ADR contest in Germany where roses are observed for 2 years under no spray conditions. 2013 AARS winner.

NEW! FUN IN THE SUN™

PPAF. An eye-catching, English-style grandiflora rose with large 3"-4" flowers in mixed shades of pale yellow with pink tones and a fruity fragrance. A 2021 Weeks introduction, this selection is true to its name, performing best when planted in full sun and having good disease resistance. Great for a pollinator garden or mixed border. Zone 4.

GRANDE AMORE™ ELEGANZA®

PP17047. A beautiful red hybrid tea with glossy green foliage. Light fragrance. Kordes introduction. Zone 5.

GOLD STRUCK™

PP24971. This rose has good vigor and is disease resistant for a grandiflora. Golden yellow flowers tinged with orange show nicely against dark green of foliage. Flowers are 4" wide when fully opened. Zone 5.

JOHN F. KENNEDY

THE classic white hybrid tea. This strong, classy and handsome rose has withstood the test of time. As popular today as ever. Zone 5.

LASTING PEACE™

PP10544. Deep coral-orange blooms are held high above the body of this tall bushy plant. The luscious foliage shiny green and disease resistant. Slightly fragrant. Zone 5.

LET FREEDOM RING™

PP17821. A long stemmed red hybrid tea with impeccable flower form and great vase life is the pinnacle of discovering a new rose variety. This striking prize winner was created by WWII veteran and amateur hybridizer, Ernest Earman of Virginia. Zone 5.

LOVE

Blooms of lustrous scarlet with white reverse sides are produced in profusion by this popular bi-colored Grandiflora. Zone 5.

LOVE'S PROMISE™

PP9253. The brightness of the perfectly shaped flowers attracts the eye with its deep currant-red blooms standing tall above the deep green foliage. Perfect for cutting. Strong raspberry fragrance. Excellent disease resistance. Zone 5.

MARILYN MONROE™

PP14398. An interesting creamy apricot color sets this rose apart. The flower form is a perfect tea rose. It is heat tolerant and the cut flowers hold up well. Mild fragrance. Zone 5.

MELLOW YELLOW

PP14401. This hybrid tea has large, clear pure yellow flowers on long stems and is a good cutting rose. The yellow color holds until the petals drop. Naturally vigorous and easy to grow. Medium, tall and upright habit. Zone 5.

MEMORIAL DAY™

PP16572. It takes only one of these huge, old-fashioned flowers to fill an entire room with the sweet, classic scent of a rose. This hybrid tea loves the hot weather which will help it to unfurl its lovely petals of clear pink with a hint of lavender. Zone 5.

MICHELANGELO™

PPAF. With its sweet lemony fragrance and its vibrantly saturated golden petals, this Romantica® rose will find a permanent home in your garden. Perfect stems for cutting and old fashioned blooms to win your heart. Zone 5.

MOONLIGHT ROMANTICA®

PPAF. Displays a large light yellow full double flowers that are fragrant. This upright and bushy rose is very vigorous on its own roots.

MOTHER OF PEARL™

PP18707. This soft pearl colored Grandiflora has perfect flower shape on a plant that is way above its class for resistance to black spot and winter hardiness. Performs well in hot humid areas and exceptionally well in cooler climates. Zone 5.

OPENING NIGHT™

PP11265. Award-winning hybrid tea rose bred from two award-winning parents. An exquisite cut rose with velvety red petals that slowly spiral open atop long, strong stems. Dark green glossy foliage; tall, upright growth habit. Zone 5.

OREGOLD

The gold standard for yellow hybrid teas. Unrivaled for its deep color that never seems to fade. With its perfect, high-centered form and deep green foliage, 'Oregold' is a rose that's hard to beat. Zone 5.

PEACE

The world's most famous rose, in brilliant yellow and pink, was first introduced to the U.S. by Conard-Pyle over 60 years ago and is more popular today than when it was first introduced. Voted into the Rose Hall of Fame by the World Federation of Rose Societies in 1976 and later as the Rose of the 20th Century. Zone 5.

PETER MAYLE™

PP11660. Classically beautiful, large, deep pink blooms, often measuring 4"-5" in width, top long stems making this a perfect rose for cutting. Heavily scented with "old rose" fragrance. Tall and upright. Zone 5.

PINK TRAVIATA®

PP16890. This hybrid tea Romantica® is a mutation of the popular variety 'Traviata'. Like its parent, it is one of the most disease resistant modern roses and is as good as if not better than most landscape shrub roses. Perfect for the garden or when cut in the vase, this deep pink old-fashioned flower is a nice addition to this ever popular family. Zone 5.

PINKERBELLE

PPAF. Buds spiral open to form abundant and unique 4" blooms of cream and muted pink and lavender, finished with a pink picotee edge. Sensational fragrance. Excellent resistance to rusts and mildews. Mature at 5'- 6' tall x 4' wide. Vigorous and upright. Zone 5.

POPE JOHN PAUL II

PP19107. One of the best white hybrid tea roses available. The plant is bushy and full and shows disease resistance. The large pure white blossoms are fragrant with a citrus scent. Zone 5.

PRINCESSE CHARLENE DE MONACO®

PP24296. This Romantica® type hybrid tea rose has flowers with a light apricot to shell pink color. The fragrant flowers will make a good choice to use as a cut flower. Excellent disease resistance for the type. Zone 5.

QUEEN ELIZABETH

A long-time favorite Grandiflora. So vigorous it is suitable for hedges and background plantings. Radiant, luminous pink flowers with medium-size blooms develop from very compact, pointed buds in small clusters. Zone 5.

SAVANNAH™ SUNBELT®

PP26285. A disease resistant hardy rose with salmon flowers and very strong fragrance. The plant is compact and lush with a strong fragrance. Korde's introduction. Zone 5.

SECRET™

PP8494. A wonderful blend of classic hybrid tea bud form, flower form and seducing spicy fragrance. Topping a show-off plant is a blend of creamy yellow shades suffused with pinks that vary from flower to flower with the season and weather. Zone 5.

STILETTO™

PPAF. A traditional dark red magenta colored tea rose with perfect form. The foliage is dark green and glossy which contrasts beautifully with the flower. Strong fragrance. Zone 5.

ST. PATRICK®

A lovely yellow hybrid tea which has a touch of gold in cooler weather. The chartreus-shaded, slow opening buds spiral open to lovely yellow flowers. Foliage is grey-green. Medium, rounded to upright habit. Zone 5.

SUGAR MOON™

PP23475. An elegant hybrid tea rose with a strong fragrance of cold-cream perfume. Pointed buds spiral open to broad, pure-white petals. Foliage is black-green making a stunning contrast. Strong, long stems are good for cutting. Vigorous. Rebloomer. Tall, very upright and bushy habit. Zone 5.

SUNNY SKY ELEGANZA

PP22352. A hardy large yellow tea rose with great disease resistance. Lush dark green foliage with slight fragrance. Korde's introduction. Zone 5.

SWEET MADEMOISELLE™

PPAF. Large full blooms that are unique in color. Temperatures create an array of colors; lighter in the heat and deeper pink in the cooler temperatures. This fragrant tea rose grows with great vigor on its own roots. Zone 5.

SWEET SPIRIT

PPAF. Handsome fully double 3" red flowers are richly perfumed. A profusion of color against marvelous subtly glossy, deep green foliage. Vigorous with improved tolerance of humidity and resistance to black spot. Mature at 5'- 6' tall x 3'- 4' wide. Bushy and mounding. Zone 5.

TAHITIAN TREASURE™

PP25655. This beautiful garden rose has the attributes of a landscape shrub rose with good habit and flowering. It has great deep salmon color and is a good rebloomer. Some disease resistance. Zone 5.

TRAVIATA®

PP10845. A vibrant red hybrid tea with true quartered, old-fashioned blooms and disease-resistant foliage that defies the rules. Traviata™ continues to be the center of attention throughout summer and into the late fall. Use as a specimen or in mass to make a statement. Zone 5.

TROPICANA

Winner of 12 international awards, this long-stemmed rose has an intense fruity fragrance in a flashy blend of coral and orange. Zone 5.

TWILIGHT ZONE

PP24725. Double, old-fashioned grandiflora rose has deep velvet-purple flowers open from large buds. The flowers look to be overlaid with a wisp of smoke. Strongly scented of clove and lemony citrus blossom. Medium, rounded to slightly spreading habit. Zone 5.

VETERANS' HONOR®

Stunning red hybrid tea with huge blossoms of impeccable form. Long cutting stems makes this rose perfect for making a grand bouquet. Zone 5.

#3 \$15.95

CLIMBING ROSES

AMERICA™

Award winning, fast growing, very vigorous climber that boasts tons of perfectly shaped coral flowers through the season. Very fragrant, which is a rare treat in modern climbers. Zone 5.

BLAZE

Color cascades from this low-maintenance American favorite with pure red roses opening all at once and continuing their bloom through fall. Blooms on new and old wood. Zone 5.

CLOUD 10™

PP24295. A pure white climbing rose that has a very full flower similar to the English roses. It is hardy to zone 6 (in zone 5 it would be more like a large shrub). It will do great everywhere, but especially in the South and all areas troubled with black spot. Zone 6.

DON JUAN

Its dark red velvety, very fragrant flowers have seduced gardeners and rosarians alike for more than half a century. There is a bit of a mystery about the Italian hybridizer of this very popular rose as he is almost impossible to find references to. Zone 5.

DUBLIN BAY

Large red fully double flowers will open in colder temperature. It is somewhat slow to climb, but when it is established the canes extend up to 10 ft. Slight fruity fragrance. Zone 5.

EDEN® CLIMBER

Perhaps the best known rose since 'Peace' and 'Mister Lincoln'. 'Eden®' is one of the best selling climbers year after year. Sometimes slow to establish, 'Eden' will reward the patient gardener with an abundance of repeating pastel pink flowers rarely seen with such large blooms. Extremely winter hardy and disease resistant. Zone 5.

FOURTH OF JULY™

PP11518. 'Fourth of July' reaches skyward with a burst of vibrant colors just like the fireworks that inspired the name. This velvety red and white striped climber will have gardeners celebrating all summer as repeat flowers explode in a shower of sweetly fragrant blossoms. Zone 5.

NEW! FRUITY PETALS™

PP28657. A disease resistant bushy climber, best described as coral with a yellow eye. This upright climber explodes with a heavy flush of blooms in the spring and reblooms throughout the season. Slightly scented. 6" tall. Zone 5.

NEW! GOLDEN OPPORTUNITY™

PPAF. A 2021 Weeks introduction, these golden-yellow blooms look like hybrid tea flowers that are good for cutting. Julia Child is one of its parents, so it should be a winner. This variety is vigorous and large with long canes and makes a strong vertical statement on a pergola or trellis. It has good disease resistance and a delicious fruity scent that attracts pollinators. 10-12' tall. Zone 5.

GOLDEN SHOWERS

Popular yellow climber for nearly 50 years has bright yellow-gold flowers with honey-like fragrance, blooming spring through fall on robust plants. Zone 5.

ICEBERG CLIMBER

A rugged climber with beautiful and fragrant cool white blooms that open to large double roses. Truly vigorous and hardy, this rose will bloom throughout the summer. Zone 5.

JOSEPH'S COAT

'Joseph's Coat' is a hardy, large-flowered climbing rose producing showy clusters of urn-shaped to cupped, double yellow flowers, suffused orange-pink and red as the flowers grow older. Zone 5.

NEW! KISS ME KATE™ ARBOROSE®

PP30810. From Kordes, this vigorous climbing rose sports extremely fragrant, beautiful medium-pink blooms with a classical bud shape. Foliage is dark green with excellent disease resistance. Stems are long enough for good cut flowers. Strong fragrance. 10' tall x 4' wide. Zone 5.

LADY IN RED™ ROMANTICA®

PPAF. A well contained climber, it's more compact than most. USA raised, she boasts the true classic American red coloration that does not turn pink or blue. The bloom has a light tea fragrance with large, old-fashioned ruffled blossoms. Zone 5.

NEW DAWN

A hardy, classic, old favorite with an abundant show of pink flowers peaking in the spring and repeating all summer. Zone 5.

THE PRETTY IN PINK EDEN®

PP20953. All the greatest qualities of the Eden® rose with a beautiful deep pink color. A Romantica® rose, this plant is grown on its own roots and is disease resistant. Zone 5.

POLKA™ ROMANTICA®

PP9233. A vigorous climber that combines old rose fashion with repeat flowering, disease tolerance and winter hardiness. The strong apricot color will turn peachier during warm weather. Romantica® Series. Zone 5.

RED EDEN® ROMANTICA®

PP15052. Amazing what rose breeding can do. Although totally unrelated to Eden® Climber, this great red climber looks, feels and smells like the best selling rose. More fragrant and maybe a better and earlier bloomer in some climates. Romantica® Series. Zone 5.

NEW! TANGERINE SKIES™ ARBOROSE®
PPAF. An outstanding Kordes climber covered with strongly scented, tangerine flowers which emerge from classically shaped buds. The unique flower color and dark green, glossy foliage make a beautiful vertical focal point. 8' tall x 4' wide. Zone 5.

WHITE DAWN

PP16739. Sometimes more a rambler than a climber in habit, it is covered with pure white, gardenia-like ruffled flowers. Good rebloomer and winter hardiness. Good classical rose fragrance. Zone 5.

WHITE EDEN® ROMANTICA®

PP16739. Old-fashioned white flowers cover this very vigorous climber from head to toe in the spring and contrast nicely with its dark foliage. The growing behavior, plant habit, disease resistance and repeat flowering patterns are exactly the same as 'Eden® Climber', one of the most famous Romantica® climbers. Zone 5.

WINNER'S CIRCLE™

PP19310. This climber from the breeder of 'Knock Out' is sure to become a favorite; it is one of the most floriferous climbers ever introduced. The fire engine red color is non-fading and can take the heat. In the fall the foliage turns deep burgundy-red and the plants is covered with bright orange hips. Zone 5.

ZÉPHIRINE DROUHIN

Deep pink blooms unfurl to completely cover the grass green foliage of this old-fashioned thornless climber. Bourbon fragrance fills the air around each large bloom. Zone 5.

#3\$15.95

CLIMBING ROSES ON TRELLIS

NEW! AMERICA™

Trained on a trellis, this award winning, fast growing, vigorous climber boasts tons of perfectly shaped coral flowers through the season. Very fragrant, which is a rare treat in modern climbers. Zone 5.

NEW! LADY IN RED™

PPAF. Trained on a trellis, this well contained climber is more compact than most. USA raised, she boasts the true classic American red coloration that does not

turn pink or blue. The bloom has a light tea fragrance with large, old fashioned ruffled blossoms. Zone 5.

NEW! WHITE DAWN

PP 16739. Trained on a trellis to encourage a climbing habit, this rose is covered with pure white, gardenia-like ruffled flowers. Classical rose fragrance. Good rebloomer and winter hardiness. Zone 5.

#7\$29.00

FLORIBUNDA ROSES

ADOBE SUNRISE™

PP22793. A compact rose with bright salmon orange flowers that hold up for a long time. It is self cleaning and the small leaves display nicely with the flowers. Slight fragrance. Zone 5.

ARCTIC BLUE™

PPAF. Loads of shapely flower buds become lilac-pink blossoms and age to a unique lavender-blue tone, then finish with a cream color on the reverse of the petals. Fragrance is moderately fruity to citrus-like. Upright and moderately spreading habit. Zone 5.

ANGEL FACE

One of the best roses of the 20th Century. The purest lavender color with one of the strongest fragrances in modern roses. Ruffled petals add to the charm. A true floribunda in habit. Zone 5.

BOLERO™

PP17841. This predominantly white rose opens with a touch of pink and is a wonderful rose for cutting. This compact Romantica® has an extraordinarily strong fragrance of traditional rose mixed with tropical fruit. Beautiful disease resistant foliage. Zone 5.

BRICK HOUSE™

A vivid statement in the rose garden. Strong, dark red flowers adorn this bushy rose with each flush throughout the season. Excellent disease resistance. Good rebloomer. Mature at 3.5'. Bushy. Zone 5.

BRILLANT™ VERANDA®

PP19362. Medium size bright red orange flowers cover this plant all summer long. The deep green foliage stands out as a nice contrast. Disease resistant. Bushy habit. Mild spice scent. Kordes introduction. Zone 5.

CANYON ROAD™

PP28541. This floribunda rose has a unique and beautiful brick red color. Good disease tolerance. Makes a nice accent plant with a striking pop of color in a border planting. Mature at 2.5' tall x 3.5' wide. Very bushy habit. Zone 5.

CELESTIAL NIGHT™

PPAF. Old-fashioned, very double plum-purple flowers with a raspberry reverse make an outstanding show in the rose garden! Quite a performer. Mild fruity fragrance. Medium, upright and bushy habit. Zone 5.

CINCO DE MAYO™

PP21709. This floribunda boasts a non-stop display of flowers whose color is almost impossible to describe. A distinctive mix between smoked lavender and rusty red orange, with the plant habit and great foliage of its award winner parent Julia Child. Zone 5.

NEW! CREAM VERANDA®

PP21198. An upright, bushy and compact shrub rose which evokes romance. Beautiful, fragrant apricot-cream flowers. A Kordes introduction, it is very disease tolerant and performs well in hot climates. Great in containers and the landscape. Moderately strong fragrance. 2½' tall x 2½' wide. Zone 5.

NEW! DESMOND TUTU SUNBELT®

PP 22828. From Kordes, this rose has glossy deep green foliage and good disease resistance. The deep red flowers have a slight fragrance. It is a recurrent bloomer throughout the season with both clusters and single flowers. 3' tall x 2 ½' wide. Zone 5.

THE EASTER BASKET™

PP18686. Creamy yellow blooms with pink ruffled edges, this rose just keeps on blooming. The semi-double flowers are long lasting. Zone 5.

EASY SPIRIT™

PPAF. Produces classy white large flowers with a cream base. Perfectly formed buds and flowers hold their beauty throughout the life of the flower, making them great for bouquets. Nationally proven resilience to rose disease. Mild tea fragrance. Zone 5.

GILDED SUN

This non-fading yellow rose has exceptional disease resistance for a floribunda. It grows well on its own root and has good dark green glossy foliage. Zone 6.

GINGERSNAP

Mixed shades of bright orange and yellow with peach flush and edging describe the gorgeous blooms of this hardy and disease resistant hybrid. The sunny blossoms begin as urn shaped buds and bloom throughout the season. Zone 6.

HOT COCOA™

PP15155. Maybe it's chocolate, maybe it's smoky or brick or russet. The colorful hues of Hot Cocoa™ vary with differences in climate. This easy to grow Floribunda will become a focal point in any garden because of its unique beauty.

ICEBERG

This AARS winner is a Kordes introduction and is a top performer. The habit is upright and it is a great choice for hedges. Pure white flowers. Mild honey fragrance. Zone 5.

JULIA CHILD™

PP18473. Julia loved the butter-gold color of this beautiful Floribunda. The perfectly rounded habit of this beautiful plant along with its disease resistance will make this rose a popular choice for gardeners. A wonderful rose to include in any cutting garden. Zone 5.

LAVENDER VERANDA®

PP23683. Beautiful lavender flowers and disease resistance are what make this rose a standout. Great for a container or a small space. Kordes introduction. Slight fragrance. Zone 5.

LEONARDO DA VINCI™ - 'Meideauri'

PP9980. A pink Romantica® rose with large clusters of very full and quartered flowers and a lovely mild tea scent. Excellent disease resistance. Mature at 6'-7' tall x 4' wide. A low, spreading climber. Zone 5.

JULIO IGLESIAS™

PP20719. This handsome rose has red and white striped petals set against striking dark foliage. Good disease resistance and growth habit. Zone 5.

LIVING EASY™

PP9161. Scrumptious flowers of showy apricot orange will light up your landscape. Produces many blooms and the foliage is glossy green and free from black spot. Takes root and grows with ease. Very consistent in all climates.

MARMALADE SKIES™

PP12579. Abundant, tangerine orange blooms cover this compact, everblooming plant. Ideal for low borders, or as a specimen in any landscape. The cluster of blooms make for a perfect one stemmed bouquet. Zone 5.

PASSIONATE KISSES®

PPAF. The fresh salmon colored blooms blend well in any landscape – a perfect companion plant in mixed perennial beds. This Floribunda is always in bloom! The non-stop blooms, along with the attractive shape of this rose, make it perfect for cutting to enjoy indoors. Zone 5.

PLUM PERFECT™ SUNBELT®

PP22691. Plum colored double flowers are showy with the dark green shiny foliage. Heat and humidity tolerant. Moderate fragrance. Kordes introduction. Zone 5.

POLYNESIAN PUNCH™

PP28073. A compact floribunda that would do well in a container. The flowers range from yellow, to orange to pink and it blooms all season. Slight fragrance. Zone 5.

RAINBOW SORBET™

PP16408. As colorful as a rainbow, as refreshing as a taste of sorbet on a hot summer day. Medium-sized blooms in shades of bright yellow, orange and red. All the wonderful qualities of the Floribunda class on a plant with disease resistance equal to that of many shrubs. Zone 5.

ROSIE THE RIVETER™

PPAF. Very glossy, dark foliage really highlights the bloom color on this stunning rose. Blooms are hardy in shades of oranges and golds suffused with pink then gold on the reverse. Fragrance is moderately fruity with hints of spice and cinnamon. Medium, rounded and bushy habit. Zone 5.

SCENTIMENTAL™

PP10126. The first striped rose to win AARS honors. No two flowers are alike, but all share the same distinctive deep red-burgundy on white to cream features that make this rose so unique. Spicy fragrance and dark glossy foliage just enhance the overall look of this striking rose. Zone 5.

SOUTH AFRICA® SUNBELT®

Lovely dark gold cupped flowers bloom in clusters and rebloom throughout the season. Moderate fragrance. Kordes introduction. Zone 5.

SUNSPRITE

Considered one of the finest yellow roses in existence, 'Sunsprite' has good disease resistance with excellent form. Zone 5.

TAKE IT EASY™

PPAF. Naturally disease resistant, this stunning red rose with pink undersides is an easy to care for shrub rose. Self cleaning and green shiny foliage all summer long. Slight tea rose fragrance. Zone 5.

VAVOOM™

PP20166 Glowing color in tones of orange, reminiscent of orange juice, lasts until the very end of these long-lived blossoms. New growth is mahogany red over glossy green foliage. Moderately spicy fragrance. Medium, low, rounded and compact habit. Zone 5.

#3\$15.95

MINIATURES

AMBER SUNBLAZE®

PP20779. This addition to the popular Sunblaze® family has all the qualities that made the family some of the most sought after miniature roses over the last twenty years. Its aggressive bright orange color is sure to make a bold statement whether in the container garden or in mixed borders with perennials. Zone 5.

AUTUMN SUNBLAZE®

PP9652. An improved version of Orange Sunblaze. The bloom is a brighter orange that does not fade. Out-performs many garden and pot rose varieties. The bloom and foliage persist through hot, dry summer months. Zone 5.

BRIDAL SUNBLAZE®— ‘Meilmera’

PP10002. The best white flowering miniature rose! Graceful, long lasting and durable soft white blooms are fully double. A perfect plant for lining walkways, placement in containers and small gardens. Mature at 12”-15” tall x 18” wide. Short and bushy. Zone 5.

CANDY SUNBLAZE®— ‘Meidanclar’

Abundant and continuous pink and white striped cup shaped blooms start deep pink to wine-red striped with white. A perfect plant for lining walkways, placement in containers and small gardens. Mature at 18”- 24” tall and wide. Compact, rounded and bushy. Zone 5.

CHERRY SUNBLAZE®— ‘Meibekarb’

Blooms are a true, bright red! A sister plant of Debut in all respects except flower color. Floriferous and neat. A perfect plant for lining walkways, placement in containers and small gardens. Mature at 12”-15” tall x 18” wide. Short and bushy. Zone 5.

MANDARIN SUNBLAZE®

PP13291. Large bright orange flowers on this bushy upright miniature plant. Light spicy fragrance. Zone 5.

RAINBOW SUNBLAZE®— ‘Meigenpi’

PP17481. Covers itself with small buds having a bright yellow cast with red undertones which transform into stunning orange-red flowers. Vigorous and bushy. A perfect plant for lining walkways, placement in containers and small gardens. Mature at 12”-18” tall x 18” wide. Medium, bushy. Zone 5.

RED SUNBLAZE®

Plants are vigorous, upright and freely branching. Creates a spectacular hedge, bringing truly vivid red color to traffic control barriers. Zone 5.

SWEET SUNBLAZE®

Clearest pink of the Sunblaze family. Beautiful, unfading, full double blooms up to 2-inches across and showing attractive yellow stamens. Vigorous, bushy and tall. Zone 5.

YELLOW SUNBLAZE®

PP14274. With blooms as bright as the sun, its size and growth habit offer unlimited landscape possibilities. Winter hardy with a vigorous growth habit, this bushy yet compact plant will bloom non-stop spring through fall. Zone 5.

#2 Deco Pot..... \$14.50

PATIO TREE ROSES

DOUBLE KNOCK OUT® TREE

PP16202. From the same cross that produced the original Knock Out®, The Double Knock Out® rose represents the next generation in the family of The Knock Out® roses. The full double flowers look just like a classic rose. Zone 5.

PEACH DRIFT® ROSE TREE

PP18542. Soft and subtle peach blooms cover this plant from mid-spring to the first hard freeze. As one of the most floriferous plants, Peach Drift® will pair well with any perennials in the landscape. Zone 5.

NEW! PEACHY KNOCK OUT® ROSE TREE

PP25628. Best for the mid-Atlantic and northern markets, this rose blooms from spring to fall. Pink flowers with yellow centers, the overall color effect is peach, which becomes more intense with cooler temperatures. Zone 4.

PINK DOUBLE KNOCK OUT® ROSE TREE

PP18507. Bright bubble gum pink classic shaped flowers adorn this pink version of The Double Knock Out®. Superior drought tolerance and flowers from early spring to frost make this rose a show stopper. Zone 5.

RED DRIFT® ROSE TREE

PP17877. Delicate red flowers with excellent disease resistance are what sets this Drift® rose apart from the rest. Perfect for border plantings or anywhere it is allowed to drape naturally, Red Drift® will be sure to add unmatched beauty to your landscape or garden. Zone 5.

SUNNY KNOCK OUT® TREE®

PP18562. The newest release of the family, this rose has bright yellow flowers that fade quickly to a lovely pastel cream color. Yellow color stays longer in cooler weather and this rose has a more upright habit. Zone 5.
#5 Patio Tree – budded at 24”..... \$32.95

AUTUMN SUNBLAZE® TREE

PP9652. An improved version of Orange Sunblaze. The bloom is a brighter orange that does not fade. Out-performs many garden and pot rose varieties. The bloom and foliage persist through hot, dry summer months. Zone 5.

YELLOW SUNBLAZE® TREE

PP14274. This Sunblaze® rose has blooms as bright as the sun. Its size and growth habit offer unlimited landscape possibilities. Winter hardy with a vigorous growth habit, this bushy yet compact plant will bloom non-stop spring through fall. Zone 5.
#5 Patio Tree budded at 18” \$32.95

POLLINATION GUIDELINES

Many fruit trees require pollination from another variety of the same type in order to produce fruit. The trees must be blooming at the same time for them to cross pollinate. Some fruit varieties are self-pollinating and do not need another tree to pollinate them. See the chart on the following page for specific information for each variety. Our picture tags on each tree have specific pollination information.

APPLES

Most apple varieties need pollination from another variety that is blooming at the same time. Some apples are self-pollinating so only one variety is needed. Some apples are pollen sterile, which means they will not pollinate other apples, but they still need a pollinator to produce fruit.

APRICOTS, PEACHES, PERSIMMONS AND NECTARINES

All of our apricots, peaches, persimmons and nectarines are self-pollinating.

CHERRIES

All of our tart cherries are self-pollinating. Most sweet cherries need a pollinator, but there are a few that are self-pollinating.

PEARS

Most European and Asian pears need pollination from another variety. Seckel and Bartlett will not cross pollinate. Most Asian pears and European pears are not compatible, but Bartlett will pollinate Asian pears that bloom at the same time.

PLUMS, PRUNES, PLUMCOTS AND PLUOTS

Most European prunes and plums are self-pollinating. Most Japanese plums are self-pollinating, and European and Japanese plums will not cross pollinate. Plumcots and Pluots can be pollinated with Japanese plums.

MATURE TREE SIZES

The ultimate size of a fruit bearing tree is controlled by how aggressively the tree is pruned. Fruit trees should be pruned annually to encourage new growth and fruit production. Most fruit trees are budded on dwarfing root stock so they are smaller than standard size fruit trees. Generally, dwarf trees will achieve a mature height of 8-10 feet and semi-dwarf trees will reach 15 feet.

POP MATERIALS

Our fruit trees have large color picture tags with botanical illustrations painted by artists. There is easy to understand pollination information for every variety on each tag, as well as specific cultural information for each species.

Large outdoor banners are available to display with your fruit trees. Colorful rack cards are included with each shipment to promote Home Orcharding to homeowners.

APPLE

ARKANSAS BLACK APPLE

This beautiful, deep red, late maturing apple tastes even better after a time in storage. Best for fresh eating, sauces and baking. Mid-season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

BALDWIN APPLE (Not available in 2021).

This heirloom variety was first grown in Massachusetts in the 1750's. The fruit is reddish green and is a great apple for fresh eating or cooking. Stores well. Mid-late season bloomer. Pollinator required. Semi-dwarf. Zone 5.

BRAEBURN™ APPLE

This New Zealand introduction produces late ripening fruit that is sweet with a tinge of tartness. Best for fresh eating and winter keeping. Early bloomer. Pollinator required. Semi-dwarf. Zone 5.

CHEHALIS APPLE

Early harvest. Fruit is large, greenish yellow. Tree is upright and spreading. Flesh is crisp and juicy. Good for desserts and cooking. Early to mid-season bloomer. Self-pollinating. Semi-dwarf. Zone 5.

CORTLAND APPLE

A hardy tree well suited for northern climates. Its large, red striped fruit with McIntosh parentage keeps well. Best for fresh eating, pies, cooking and canning. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

COX'S ORANGE PIPPIN APPLE

A classic English apple, often regarded as one of the finest flavored dessert apple. Fruit is medium size with red stripes over its orange flush color. The distinctive, rich complex flavors make it a good choice for desserts, pies, cooking and cider. Late season bloomer. Pollinator required. Semi-dwarf. Zone 4.

EMPIRE APPLE

A McIntosh x Red Delicious cross that has great McIntosh flavor with the crispness of Red Delicious. Keeps well. Best for fresh eating, sauces and pies. Early bloomer. Pollinator required. Semi-dwarf. Zone 4.

ESOPUS SPITZENBERG APPLE

Thomas Jefferson actually grew this variety in the Monticello orchard and it is said to have been his favorite variety. Fruit is medium-to-large and slightly oval with orangish skin, speckled with russet. Flesh is crisp and tangy. Best for fresh eating and desserts. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

FIRECRACKER™ CRABAPPLE – *Malus spp.*

'Firecracker'. A delightful sparkling jewel of an apple, Firecracker™ looks like a miniature Red Delicious. It has bright red flesh and a spritely flavor. Naturally dwarf and easy to grow. Mid-season bloomer. Pollinate with any apple or crabapple. Zone 3.

RED FUJI APPLE

Fuji's success lies in its high quality fruit that is great for both fresh eating and baking. Skin color is an attractive pink stripe over green-yellow background. Keeps well. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 5.

GALA® APPLE

This sweet and crunchy, red-orange apple matures in late summer. Considered to be one of the best for fresh eating. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 5.

GINGER GOLD® APPLE

A yellowish green summer ripening apple that is crispy and mildly tart. Great for fresh eating. Mid-late season bloomer. Self-pollinating. Semi-dwarf. Zone 5.

GOLDEN DELICIOUS APPLE

Golden Delicious is still the world's most popular apple, but the flavor is so much better from a home grown tree! Sweet and spicy and a consistent producer. Best for fresh eating, pies, cooking, canning and freezing. Mid-to-late season blooming. Self-pollinating. Semi-dwarf. Zone 5.

GOLDEN RUSSETT APPLE (Not available in 2021).

The 'champagne' of old time cider apples. A small-to-medium-apple having a golden color with a bronze blush and heavily russeted. Yellow flesh is fine-textured, crisp and highly flavored. Best for cider, fresh eating and cooking. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

GRANNY SMITH APPLE

A late season favorite that produces heavy annual crops of tart and tasty green apples. Best for fresh eating, pies and cooking. Good keepers. Mid-to-late season bloomer. Pollinator required. Semi-dwarf. Zone 5.

GRAVENSTEIN APPLE

This heirloom variety was brought to America in the late 1700's from Europe. Because of its crisp flavor, it is still a favorite among apple lovers. Best for fresh eating, cooking and canning. Early season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

HARALSON APPLE

A medium sized, red-striped apple with greenish-yellow under color. Flesh is white, crisp, juicy and firm. Good for fresh eating and cider. Late season bloomer. Pollinator required. Semi-dwarf. Zone 2.

HONEYCRISP™ APPLE

PP7197. This dessert quality apple is juicy and crisp with a delicate, mildly sweet flavor. The skin is striped scarlet-red over pale yellow. The tree is tolerant to severe winter temperatures. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

JONAGOLD APPLE

The best of both worlds – the tart Jonathan and the sweet Golden Delicious combine to make this luscious apple. Jonagold is a preferred dessert apple. Mid-season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

JONATHAN APPLE

A small-to-medium sized, bright red apple with fine, juicy flesh. Good for cooking and fresh eating. Heavy bearer. Early season bloomer. Self-pollinating. Semi-dwarf. Zone 5.

LIBERTY APPLE

Medium-to-large, bright, shiny, McIntosh type fruit is red striped with yellow-green background. Extremely disease resistant. Best for fresh eating, cooking and canning. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4

LODI APPLE

An heirloom variety that matures in early summer. The apples have crisp white flesh and are prized for pies and sauce. Early season bloomer. Pollinator required. Semi-dwarf. Zone 4.

MACOUN APPLE

Suited for northern climates, this McIntosh-type apple is preferred by many over McIntosh, one of its parents. Best for fresh eating, cooking, canning and drying. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4

McINTOSH APPLE

This heirloom variety has been around since the early 1800's and is a favorite in northern climates. This flavorful apple is best used for baking and fresh eating. Early to mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

MELROSE APPLE

Official Ohio State apple. Large, flattened fruit has yellowish-green skin flushed and streaked with dark red spots. Very good cooking and dessert quality. Tree is vigorous. Mid- to late season bloomer. Pollinator required. Semi-dwarf. Zone 5.

MUTSU (CRISPIN) APPLE

This large, yellow-gold apple with course, crisp flesh has a wonderfully sweet and spicy flavor. Best for fresh eating and baking. Mid-season bloomer. Matures late season. Pollen sterile. Pollinator required. Semi-dwarf. Zone 4.

NEWTOWN PIPPIN APPLE

When ripe this variety is green but mellows to light yellow. Good for fresh eating, cider, sauces, and pies. Has historical significance as being a favorite of George Washington and Thomas Jefferson. Antique apple. Late season bloomer. Self-pollinating. Semi-dwarf. Zone 4.

NORTHERN SPY APPLE

A very late, large apple that is considered one of the best for pies and sauce. Late blooms assure regular crops. Must be pollinated by another late blooming apple variety. Pollinator required. Semi-dwarf. Zone 5.

POUND SWEET APPLE

This heirloom variety produces large, delightfully sweet, golden russet apples late in the season. Best for fresh eating and canning. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

PRAIRIE SPY APPLE

Large fruit with attractive red over yellow skin color. Crisp, juicy flesh with excellent flavor is great for desserts

and culinary uses. Flavor improves in storage as sugars increase. Excellent for the kitchen orchard. Late season bloomer. Pollinator required. Semi-dwarf. Zone 3.

RED DELICIOUS APPLE

Fruit is sweet, crisp and beautiful. The tree produces heavy crops of extra- fancy type fruit. Best for fresh eating, desserts and salads. Keeps well. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 5.

RED ROME APPLE

The tree is a heavy producer of beautiful cherry-red fruit. Best for fresh eating, baking and cooking. Late season bloomer. Self-pollinating. Semi-dwarf. Zone 5.

ROXBURY RUSSETT APPLE

It originated early in the 17th century in Roxbury, Massachusetts, and is probably the oldest named variety of apple in America. Medium-to-large in size, and elliptical in shape, the green skin is tinged a bronze, and overspread with a brownish-yellow russet. High sugar content. Good for fresh eating, baking and cider. Late season. Antique apple. Pollinator required. Semi-dwarf. Zone 4.

SPARTAN APPLE

With firm, crisp and juicy fruit, Spartan is good for fresh eating and desserts. Very aromatic and a good keeper. Red skin and snow white flesh. Tree is strong and a heavy producer. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

STAYMAN APPLE

A heirloom apple with a wonderful sweet-tart flavor. The apples are large and deep red in color. Best for fresh eating, baking and long storage. Late season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

SUMMER RAMBO APPLE

Large, brightly striped, red fruit. Flesh is yellowish-green and crisp with an exceptionally juicy flavor. A vigorous, hardy and productive apple variety. Best for fresh eating, sauce and baking. Late season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 4.

WEALTHY APPLE

Medium sized fruit ripens to pale yellow splashed with an all over scarlet when ripe. The flesh is refreshing, crisp, and very juicy. Flavor is distinctive with a hint of strawberry. Good for fresh eating, sauces and preserves. Excellent pollinator with

profuse blooms over a long period. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 2.

WINESAP APPLE

This heirloom variety has been around since the early 1800's. The fruit is bursting with spicy flavor and stores exceptionally well. Best for fresh eating, cooking and canning. Late season bloomer. Pollen sterile. Pollinator required. Semi-dwarf. Zone 5.

WHITNEY CRABAPPLE

The fruit is large for a crabapple and the skin color is light greenish-yellow with red stripes. These tender, juicy apples are great for fresh eating and sauces. Mid-season bloomer. Pollinate with any apple or crabapple. Dwarf. Zone 3.

WOLF RIVER APPLE

A heirloom variety that will produce huge apples weighing more than 1 lb. It is a good quality multipurpose apple. Best for baking and fresh eating. Mid-season bloomer. Pollinator required. Semi-dwarf. Zone 4.

YELLOW TRANSPARENT APPLE

An early ripening heirloom variety with firm, sweet white flesh. Best for cooking, sauce and fresh eating. Early bloomer. Pollinator required. Semi-dwarf. Zone 3.

#7	\$28.35
#15	\$43.80

APRICOT

BLenheim APRICOT

Blenheim is perhaps the world's most popular apricot tree. Its pale orange fruit with red dots and aromatic, sweet flavored, juicy, flesh is considered to be the most succulent of all apricots. Best for canning quality and drying. Self-pollinating. Dwarf. Zone 5.

CHINESE APRICOT

This variety produces large crops of medium-to-large fruit that mature early in the season. Fruit has very nice texture and flavor. Best for fresh eating, cooking, canning and drying. Self-pollinating. Dwarf. Zone 4.

GOLDCOT APRICOT

Developed in Michigan, this very cold hardy apricot has a record of producing regular crops of medium-to-large delicious fruits. Best for fresh eating, jam, canning, cooking and drying. Self-pollinating. Dwarf. Zone 5.

TILTON APRICOT

An excellent variety for drying and canning. It has a distinctive flavor. The fruit is medium to small in size. The color is golden-yellow with a dark red blush. Self pollinating. Dwarf. Zone 5.

FLAVOR DELIGHT APRIUM® – *Prunus spp.* ‘*Flavor Delight*’. PP7090. Apriums are apricot and plum crosses that produce the tangy taste of apricot and the sweetness of plum. Fruit is about 2” in diameter. Best for fresh eating. Pollinate with any apricot. Dwarf. Zone 6.

#7\$28.35
#15\$43.80

CHERRY

BLACKGOLD™ CHERRY – *Sweet*. This dark red fleshed cherry is a hybrid of Gold and Stella. It combines the best of both parents to produce heavy crops of beautiful, heart shaped fruit with excellent flavor and crack resistant skin. Best for fresh eating. Self-pollinating. Will pollinate other sweet cherries. Semi-dwarf. Zone 5.

BLUSHING GOLD™ CHERRY– *Sweet*. PPAF. From Geneva, New York, this blonde cherry with a slight blush is heavy fruiting. The fruit is very sweet and crack-resistant. Must be pollinated by another sweet cherry. Semi-dwarf. Zone 5.

BLACKYORK™ (EASTERN BING) CHERRY – *Sweet*. The same large, dark red-black, delicious cherries as Bing, but disease resistant and better suited to Eastern growing conditions. Best for fresh eating. Must be pollinated by another sweet cherry variety. Semi-dwarf. Zone 5.

KRISTIN CHERRY – *Sweet*. A glossy, purplish-black fruit with tender skin. Juicy flesh is meaty and firm. Tree is vigorous, hardy and heavy cropping. Best for fresh eating. Must be pollinated by another sweet cherry variety. Not compatible with Emperor Francis. Semi-dwarf. Zone 5.

REGINA™ CHERRY – *Sweet*. PP11530. This German variety produces high quality, dark red fruit. Cherries are large, firm and best for fresh eating. Trees are productive and disease resistant. Must be pollinated

by another sweet cherry variety. Not compatible with Van. Semi-dwarf. Zone 4.

RYNBRANDT CHERRY – *Sweet*. Early season, large, black sweet cherry. Rynbrandt is resistant to fruit cracking and is very tasty. Best for fresh eating. Must be pollinated by another sweet cherry variety. Semi-dwarf. Zone 5.

ULSTER CHERRY– *Sweet*. A large crack-resistant dark red cherry. Must be pollinated by another sweet cherry. Semi-dwarf. Zone 5.

WHITEGOLD® CHERRY – *Sweet*. This yellow fleshed sweet cherry is a hybrid of Emperor Francis and Stella. It combines the best of both parents to produce heavy crops of round shaped fruit with excellent flavor and crack resistant skin. Best for fresh eating. Self-pollinating. Will pollinate other sweet cherries. Semi-dwarf. Zone 5.

BALATON® CHERRY – *Hungarian Tart*. Fruit matures after Montmorency to extend the tart cherry season. These large, high quality cherries are best used for fresh eating and baking. Developed in Hungary. Self-pollinating. Semi-dwarf. Zone 5.

DANUBE™ CHERRY – *Hungarian Tart*. (*Erdi Botermo cv.*) Medium-to-large, dark red fruits are sweeter than Montmorency. Very productive, naturally dwarf tree. Developed in Hungary. Best for fresh eating and baking. Self-pollinating. Semi-dwarf. Zone 4.

JUBILEUM™ CHERRY – *Hungarian Tart*. (*Erdi Jubileum cv.*) Maturing about 10 days ahead of Montmorency, this dark fleshed tart cherry produces large, high quality fruit. Developed in Hungary. Best for fresh eating and baking. Self-pollinating. Semi-dwarf. Zone 4.

MONTMORENCY CHERRY — *Tart*. The absolute standard of all tart cherries. Bright red fruit with yellow flesh. Early and heavy producer. Best for fresh eating, pies, cooking, canning and freezing. Self-pollinating. Semi-dwarf. Zone 5.

#7\$28.35
#15\$43.80

CARMINE JEWEL™ BUSH CHERRY – *Prunus fruticose x Prunus cerasus*. Fruit has dark red flesh, rich cherry flavor and high flesh to pit ratio making it excellent for making pies, preserves, juice, dried fruit and fresh-eating. Naturally dwarfed. Extreme cold-hardiness. Self-pollinating. Mature at 6.5’ tall x 6’ wide. Zone 2.

JULIET™ BUSH CHERRY – *Prunus fruticose x Prunus cerasus*. Full sized dark red fruit with the perfect sugar content and low acidity for fresh eating. This variety is an excellent choice for pick your own orchards. Naturally dwarfed. Extreme cold-hardiness. Self-pollinating. Mature at 6½’ tall x 6’ wide. Zone 2.

ROMEO™ BUSH CHERRY – *Prunus fruticose x.p cerasus*. This bush cherry was selected for fruit sweetness and quality. The fruit is dark crimson with a small pit and does not split. Romeo makes a lovely ornamental plant. Mature size 6-7’ tall x 6’. Zone 2.

#7\$28.35

EDIBLE CRABAPPLE

FIRECRACKER™ CRABAPPLE – *Malus spp.* ‘*Firecracker*’. A delightful sparkling jewel of an apple, Firecracker™ looks like a miniature Red Delicious. It has bright red flesh and a spritely flavor. Naturally dwarf and easy to grow. Mid-season bloomer. Pollinate with any apple or crabapple. Zone 3.

WHITNEY CRABAPPLE – *Malus spp.* The fruit is large for a crabapple and the skin color is light greenish-yellow with red stripes. These tender, juicy apples are great for fresh eating and sauces. Mid-season bloomer. Pollinate with any apple or crabapple. Zone 3.

#7\$28.35

NECTARINE

ARCTIC GLO NECTARINE
PP7884. This white fleshed nectarine is juicy and sweet. The fruit is a brilliant crimson-red with a creamy white under color. Best for fresh eating. Self-pollinating. Dwarf. Zone 5.

MERICREST NECTARINE

A super hardy variety that can withstand temperatures of -28° F. The fruit has a tangy, sweet taste and is best for fresh eating, canning and desserts. Freestone. Self-pollinating. Dwarf. Zone 5.

REDGOLD NECTARINE

Redgold nectarine produces very high quality fruit that is sweet, juicy and slightly tangy at maturity. Fruit is large and deep red in color. Best for fresh eating, cooking, canning and freezing. Freestone. Self-pollinating. Dwarf. Zone 5.

SUNGLO NECTARINE

This variety is a heavy producer of mid-season fruit with beautiful color and exceptional flavor. Freestone. Self-pollinating. Dwarf. Zone 5.

#7\$28.35

#15\$43.80

PEACH**BELLE OF GEORGIA PEACH**

A late season, white fleshed peach that is exceptionally hardy. Mature fruit has a wonderful aroma and very sweet characteristic taste. Best for fresh eating, pies, cooking and canning. Freestone. Self-pollinating. Dwarf. Zone 5.

BLUSHINGSTAR® PEACH

PP10554. A firm, high quality, white flesh peach which matures late in the season. Very productive tree. Best for fresh eating, shipping and storing. Freestone. Self-pollinating. Dwarf. Zone 5.

BONANZA MINIATURE PEACH

This freestone yellow peach produces large sweet fruit. Great for small gardens or container growing. Mature height 4'. Self-pollinating. Miniature. Zone 6.

CANADIAN HARMONY PEACH

This late flowering freestone variety produces large golden peaches with lots of red blush. Great for salads because it is slow to brown, it also freezes well. Self-pollinating. Dwarf. Zone 5.

CONTENDER PEACH

An exceptionally hardy, medium to large peach which produces well in colder climates. In spring

the tree is covered in lovely pink blooms which are attractive to bees. The red fruit which follows is sweet and delicious. Cold hardy and disease resistant. Ripens in mid to late August. Self-pollinating. Freestone. Zone 4.

CRESTHAVEN PEACH

This hardy, late season peach is a most consistent producer. The yellow flesh is juicy and firm. Best for fresh eating, canning and cooking. Freestone. Self-pollinating. Dwarf. Zone 5.

INDIAN BLOOD PEACH

Its name describes it perfectly, an old fashioned Indian peach with a good quality flavor and dark crimson skin and flesh. This variety was also grown by Thomas Jefferson at Monticello. Heavy producer. Best for pickling and preserving. Cling. Self-pollinating. Dwarf. Zone 5.

JULY ELBERTA PEACH

A large, juicy, yellow fleshed peach that is best for fresh eating, canning and freezing. Mid-season. Freestone. Self-pollinating. Dwarf. Zone 5.

LORING PEACH

Large, mid-season, yellow peach lends itself well to canning, cooking and fresh eating. Freestone. Self-pollinating. Dwarf. Zone 5.

MADISON PEACH

A hardy yellow freestone peach. The fruit ripens midseason and is flavorful. Good for fresh eating and canning. Self-pollinating Dwarf. Zone 5.

REDHAVEN PEACH

This yellow fleshed peach matures early and crops heavily. It is exceptionally hardy and the standard by which all other peaches are compared. Best for fresh eating, pies, cooking and freezing. Semi-freestone. Self-pollinating. Dwarf. Zone 5.

RELIANCE PEACH

One of the hardiest peaches available, this variety consistently produces heavy crops. Fruit is high quality and best used for fresh eating, pies, cooking and canning. Freestone. Self-pollinating. Dwarf. Zone 5.

SWEET CAP™ PEACH

This donut type peach (Peento) has white flesh and dark red skin. Perfect for fresh eating as it is juicy, sweet and the pit is small. Self-pollinating. Dwarf. Zone 5.

WHITE LADY PEACH

This beautiful red skinned peach is a real winner with its firm white flesh and mild sweet taste. A productive, cold hardy variety that ripens mid-season. Best for fresh eating. Freestone. Self-pollinating. Dwarf. Zone 5.

#7\$28.35

#15\$43.80

PEAR

ANJOU PEAR – *European*. Our highest quality winter pear. Fruit is bright green, developing a tinge of yellow at maturity. The tree is vigorous but slow to come into bearing. Best for fresh eating and winter keeping. Must be pollinated by another European pear. Dwarf. Zone 5.

BARTLETT PEAR – *European*. The most popular pear variety in U.S.A. The smooth buttery flesh is sweet and juicy. Adaptable to many different soil types and growing areas. Best for fresh eating, cooking and canning. Must be pollinated by another European pear, except Seckel. Dwarf. Zone 5.

COMICE PEAR – *European*. Comice is a luscious, rich flavored well known dessert pear. The skin color is a beautiful golden yellow tinged with a hint of red. Best for fresh eating, salads and baking. Must be pollinated by another European pear. Dwarf. Zone 5.

GOLDEN RUSSET BOSCH PEAR – *European*. A favorite of many with its sweet, juicy white-yellow flesh and cinnamon colored russet skin. Best for fresh eating and canning. Must be pollinated by another European pear. Dwarf. Zone 4.

KIEFFER PEAR – *European*

A large, green-yellow pear that matures late. Long-lived trees are resistant to fire blight. Fruit is best for fresh eating and winter keeping. Self-pollinating. Will pollinate other European pears. Dwarf. Zone 4.

MOONGLOW PEAR – *European*. This wonderful European pear matures about a week after Bartlett and shows some resistance to fire-blight. The medium-to-large pears are sweet and juicy. Best for fresh eating, canning and cooking. Must be pollinated by another European pear. Dwarf. Zone 4.

RED ANJOU PEAR – *European*. Fine textured pear with golden-white flesh that is mild and juicy. Skin is deep red and gets even brighter as it ripens. Best for fresh eating and winter keeping. Must be pollinated by another European pear. Dwarf. Zone 5.

RED BARTLETT PEAR – *European*. Beautiful red fruit is very similar to the green Bartlett. Best for fresh eating, cooking, canning and freezing. Must be pollinated by another European pear, except Seckel. Dwarf. Zone 5.

SECKEL PEAR – *European*. A very firm, small, green-red pear, prized for its high sugar content. This very productive tree bears huge crops at maturity. Best for fresh eating, winter keeping, cooking and canning. Must be pollinated by another European pear, except Bartlett. Dwarf. Zone 5.

CHOJURO PEAR – *Asian*. An early bearing variety with medium-to-large, flattened, golden-brown fruit. Habit is somewhat droopy. Best for fruit salads, fresh eating and canning. Must be pollinated by another Asian pear. Dwarf. Zone 4.

DAISUI LI™ PEAR – *Asian*. PP6075. Large, medium green fruit that bursts with juicy sweet flavors. A real taste delight that's best for fresh eating. Must be pollinated by another Asian pear. Dwarf. Zone 4.

HARDY GIANT™ PEAR – *Asian*. Also known as New Arirang, Olympic Giant and Korean Giant Pear, this giant sized (3½-4”), round Asian pear has excellent flavor. Fruit is russet brown when ripe and best for fresh eating and canning. Must be pollinated by another early blooming Asian pear. Dwarf. Zone 5.

HOSUI PEAR – *Asian*. An early season, russet type, with round globular shape. The higher acid level adds a spritz zip to the mellow flavor. Best for fresh eating and they keep well. Moderately self-fruiting, but for maximum harvests pollinate with 20th Century. Will pollinate other Asian pears. Dwarf. Zone 5.

RAJA PEAR – *Asian*. This is a must have variety if you like flavor. The fruit is an attractive golden brown with a very sweet, richly flavored, quite delectable taste. This hardy variety is very productive and disease resistant. Best for fresh eating. Must be pollinated by another Asian pear. Dwarf. Zone 4.

SHIN LI™ PEAR – *Asian*. Large, greenish-yellow fruit that is wonderfully sweet, aromatic, crisp and juicy. Very productive. Best for fresh eating. Must be pollinated by another Asian pear. Dwarf. Zone 4.

SHINKO PEAR – *Asian*. Medium-to-large, rich flavored fruit with good texture makes this variety special. A good keeper, and fire blight resistant. Best for fresh eating and canning. Must be pollinated by another Asian pear. Dwarf. Zone 4.

SHINSEIKI PEAR – *Asian*. Also known as New Century, this variety produces an early season, round, smooth, yellow skinned pear. Flesh is sweet, crisp and juicy with excellent storage life. Best for fresh eating and salads. Must be pollinated by another Asian pear. Dwarf. Zone 5.

20TH CENTURY PEAR – *Asian*. Also known as Nijisseiki, this apple pear is one of the best Asian varieties. Flesh is sweet, slightly tart, firm and juicy. Fruit is round, greenish-yellow and very uniform. Very productive. Best for fresh eating and canning. Must be pollinated by another Asian pear. Dwarf. Zone 5.

BUSH CHERRY

KOREAN BUSH CHERRY – *Prunus japonica*. (Not available in 2021). A unique and very attractive small to medium-size shrub, prized for its profuse, white, fragrant flowers in early spring. Following this spectacular flower display are small, sweet, scarlet red cherries. Mature height 7-9'. Self-pollinating. Zone 4.

- #3\$18.30

CARMINE JEWEL™ BUSH CHERRY – *Prunus fruticose x Prunus cerasus*. Fruit has dark red flesh, rich cherry flavor and high flesh to pit ratio making it excellent for making pies, preserves, juice, dried fruit and fresh-eating. Naturally dwarfed. Extreme cold-hardiness. Self-pollinating. Mature at 6.5' tall x 6' wide. Zone 2.

JULIET™ BUSH CHERRY – *Prunus fruticose x Prunus cerasus*. Full sized dark red fruit with the perfect sugar content and low acidity for fresh eating. This variety is an excellent choice for pick your own orchards. Naturally dwarfed. Extreme cold-hardiness. Self-pollinating. Mature at 6.5' tall x 6' wide. Zone 2.

ROMEO™ BUSH CHERRY – *Prunus fruticose x.p cerasus*. This bush cherry was selected for fruit sweetness and quality. The fruit is dark crimson with a small pit and does not split. Romeo makes a lovely ornamental plant. Mature size 6-7' tall x 6'. Zone 2.

- #7\$28.35

FIG

BLACK SPANISH FIG – *Ficus carica*. This variety bears abundant crops of dark mahogany fruit. The sweet, juicy firm fruit is great for fresh eating, preserves and drying. A naturally dwarf tree. Suitable for containers and capable of bearing two crops a year. Self-pollinating. Zone 7.

BROWN TURKEY FIG – *Ficus carica*. Handsome, low, bushy plant produces medium to large elongated purple-brown fruit. Everbearing beginning in early June. Mature size 10'. Self-pollinating. Zone 5.

CELESTE FIG – *Ficus carica*. These are the "candy" figs, sweet as sugar and great for desserts and gourmet recipes. Fruit is brown to purple. This hardy and vigorous plant grows 6-10'. Self-pollinating. Zone 6.

CHICAGO HARDY FIG – *Ficus carica*. Hardy for northern climates, this fig may die back to the ground but will grow back in the spring ready to produce sweet figs again. Fruit has a purple-brown colored flesh. Mature size 8'. Self-pollinating. Zone 5.

ITALIAN EVERBEARING – *Ficus carica*. This prolific bearer is very similar to Brown Turkey. Fruit is large, with a reddish-brown skin. The flesh is pink and sweet to eat. Large bush form. Self-pollinating. Mature size 15'. Zone 7.

LATTARULLA FIG – *Ficus carica*. Also known as Italian Honey Fig, this reliable and hardy variety will bear good crops of large, greenish-yellow fruit with sweet, light amber flesh. Lattarulla bears two crops in one season, one ripening in late July and the second in mid-September. Mature size 12-15'. Self-pollinating. Zone 7.

NEGRONNE FIG – *Ficus carica*. Fruit is small and almost black in color with tasty, dark red flesh. Variety is vigorous and produces two crops each season, one ripening in late July and the second in mid-September. This is a naturally small tree that works well for container gardening or small spaces. Mature size 10'. Self-pollinating. Zone 7.

OLYMPIAN FIG – *Ficus carica*. Olympian produces two crops of green and purple striped fruit with sweet, violet flesh that is excellent for fresh eating, canning or drying. It is incredibly cold hardy and reliably produces two crops. Self-fruitful. Mature at 4'-8'. Zone 6.

PETER'S HONEY FIG – *Ficus carica*. Originally from Sicily, this variety is the sweetest of all figs! The light greenish fruit is tender and sweet. Mature height is 10'. Best for fresh eating and cooking. Self-pollinating. Zone 7.

VIOLET DE BORDEAUX FIG – *Ficus carica*. A small to medium size fig with purple-black fruit having very deep red strawberry pulp and a sweet, rich flavor. Plants will thrive in extremes of heat, humidity and drought and have very good resistance to pests and disease. Enjoy fresh picked or dried. Self-fruitful. Mature at 6' - 10'. Zone 5.

#5\$23.80

GOUMI

Goumi forms a medium-size shrub growing to 6' in height with attractive, greenish-silver foliage and white, fragrant flowers. The fruit is round, scarlet-red and speckled with silver.

SWEET SCARLET™ GOUMI – *Elaeagnus multiflora*. This variety has juicy and aromatic fruit with a unique sweet-tart flavor that resembles pie cherries. Very good eaten fresh, it is also used to make preserves. Mature height 6'. Self-pollinating. Zone 4.

#3\$18.30

JUJUBE

HONEY JAR JUJUBE – *Ziziphus jujuba*. Small, spicy yet sweet, fruit with thin skin ripens very early. One of the best for coastal northern climates, yet it tolerates warm tropical conditions as well. Disease and pest resistant. Self-fertile. Mature height 12'-15'. Zone 5.

LANG JUJUBE – *Ziziphus jujuba* 'Lang'. Lang has an attractive form and bears striking, large, pear-shaped, golden brown fruit. Fruit is crisp, flavorful and

delicious eaten fresh, dried, or candied. An attractive small tree with light gray, lightly contorted branches and dainty light green foliage. Mature height 20'. Partially self-pollinating. Zone 4.

LI JUJUBE – *Ziziphus jujuba*. Li is a truly beautiful tree that produces an abundance of very large, mahogany brown fruit. The fruit is sweet, crisp, and flavorful. It is shaped like a small egg with a very small, almost unnoticeable seed. Crops are heavier when two or more varieties are planted. Mature height 8-10'. Partially self-pollinating. Zone 5.

#7\$36.00

KIWI

HARDY ANNA KIWI – *Actinidia arguta*. The sweet, emerald green flesh is sweet to eat. Fruit is round to cylindrical in shape and can weigh up to ½ oz. Vines are vigorous. Pollinator required. Zone 4.

HARDY RED KIWI – *Actinidia purpurea*. Named for its cranberry-red fruit and red flesh, this unique species bears good crops of delicious, sweet-tart flavored fruit. Pollinator required. Zone 4.

HARDY MALE KIWI – *Actinidia arguta*. This attractive, easy to grow vine is covered fragrant, white flowers in May. One male plant can pollinate up to 8 female plants. The male plant does not produce fruit. Zone 4.

NEW! ISSAI HARDY KIWI – *Actinidia arguta*. A very productive hardy kiwi from Japan. The bite-sized fruit with no fuzz are sweet and packed with vitamin C. Self-fertile but will produce more fruit with a hardy male kiwi pollinator. Grow kiwi vines on an arbor, fence or trellis. Zone 4.

#2\$18.15

MEDLAR

This plant has been popular in Europe since the Middle Ages, but is virtually unheard of in North America. It grows into a small tree with long, dark green, tropical looking foliage, accented by large white flowers and striking brown fruit. The fruit

ripens in mid-to-late October, becoming soft and turning very dark brown. It is ready to eat and has the taste and texture of spiced applesauce.

BREDA GIANT – *Mespilus germanica*. (Not available in 2021). A classic and productive variety from Holland, that bears large crops of 1½" to 1¾" diameter fruit. Sweet and fine textured, the spicy fruit is great for snacks and preserves. Likes full sun and adapts well to most soils. Mature height 8-10'. Self-pollinating. Zone 4.

#7\$33.25

MULBERRY

ILLINOIS EVERBEARING MULBERRY – *Morus alba x M. rubra*. This handsome tree has beautiful dark green, tropical-like foliage. It is valued most for its tasty 1½" long, virtually seedless fruit that is good for both fresh eating and cooking. Mature height 25-30'. Self-pollinating. Zone 5.

#7\$28.40

OLIVE

ARBEQUINA OLIVE – *Olea europaea*. This Spanish variety is a beauty with its shiny, dark evergreen leaves and weeping form. It begins bearing quality gourmet olives after one year. Tree is slow growing to about 25-30'. Self-pollinating. Zone 8.

#5\$36.60

PAWPAW

PAWPAW – *Asimina triloba*. Seedling. Exotic and attractive, this hardy, Native American fruit has a banana-like flavor with creamy custard-like flesh. This tree produces unusual purple flowers before its large, tropical looking foliage appears. Fall color is a striking yellow. Two seedling pawpaws will cross pollinate. Mature height 12-15'. Zone 5.

#3\$15.70

PINEAPPLE GUAVA

PINEAPPLE GUAVA SEEDLING – *Feijoa sellowiana*. Glossy green leaves with a whitish-silver cast underneath. Striking flowers have a crimson red center with bright pink petals. Plant several to form an attractive evergreen hedge. Dark green fruit is flavorful with a taste of mint and pineapple. Bright pink petals are sweet with a hint of cotton candy. Two are needed for proper pollination. Mature 6-8'. Zone 7.

#5 \$23.30

POMEGRANATE

AMBROSIA POMEGRANATE – *Punica granatum*. Produces large fruit with pale pink skin. The delicious purple juice from this variety has a sweet-tart flavor. Hummingbirds love the showy, orange-red flowers. Best to keep pruned to 3-6 trunks. Mature at 10'. Zone 7.

GRANADA POMEGRANATE – *Punica granatum*. PP 2618. A bud sport of Wonderful with darker, less tart fruit. Large fruit is good for fresh eating, juice and decorating. Plant can be shaped to a bush or tree form. Mature 12'. Self-pollinating. Zone 7.

WONDERFUL POMEGRANATE – *Punica granatum*. Fruit is large, greenish-red to reddish-orange with a delicious tangy flavor. Well known variety. Shrub or tree form. Mature 18'. Self-pollinating. Zone 7.

#7 \$28.40

TEA PLANT

KOREAN TEA PLANT – *Camellia sinensis*. Grow and harvest tea! This attractive evergreen is a camellia grown for foliage rather than flowers. The tea is aromatic and flavorful and this variety is one of the hardiest tea plants. Mature height 5'. Zone 7.

#5 \$23.95

BUSHEL AND BERRY®

BABY CAKES™ BLACKBERRY – *Rubus hybrid*. PP27032. Perfect for container growing. Dwarf, compact and thornless. In most regions two crops are produced per season, classic flavor. Zone 4.

BLUEBERRY GLAZE® BLUEBERRY – *Vaccinium angustifolium x corymbosum*. PP25467. In spring white flowers open and boxwood-like foliage emerges. The flowers develop into a dramatic display of berries that turn yellow, then red and ripen dark blue and aromatic. Packed with antioxidants! A great plant for containers. Mature at 2' - 3' tall and bushy. Zone 5.

JELLY BEAN® BLUEBERRY – *Vaccinium angustifolium x corymbosum*. ZF06-179. PP24662. CPBR 5496. Think of homemade blueberry jelly and you have the flavor of this handsome variety. Berries are large and flavorful over unique elongated foliage. Green leaves have red tints in cooler climates. Great when used as a mini-hedge. Mature at 1' - 2' tall and mounded. Zone 4.

PERPETUA BLUEBERRY – *Vaccinium angustifolium x corymbosum*. PP24209. A beautiful plant for the landscape with the added benefit of producing two crops of deliciously flavorful berries each year. The first ripens mid-summer, then the plant flowers a second time and sets fruit for fall harvest. Lovely color interest in the fall and winter as green leaves turn deep reds and greens. Mature at 4' - 5' tall and upright. Zone 4.

PINK ICING® BLUEBERRY – *Vaccinium angustifolium x corymbosum*. PP23336. Large fruit is robustly flavored and the foliage is a dazzling display of color in shades of pink mixed with blue and deep greens turning iridescent turquoise blue in winter. Year-round beauty. A great variety for a decorative planter. Mature at 3' - 4' tall and mounded. Zone 5.

NEW! SILVER DOLLAR™ BLUEBERRY – *Vaccinium corymbosum*. PPAF. A blueberry with unique foliage resembling that of a Eucalyptus having hints of silver in spring and summer. Medium sized blueberries ripen in summer. A mounded shrub, mature at 2'-3' tall and wide. Zone 5.

NEW! SOUTHERN BLUEBELLE™ BLUEBERRY – *Vaccinium hybrid*. PP28665. A petite blueberry perfect for small spaces or containers. Medium sized berries in summer. Lovely foliage emerges bright red and matures to green. Full sun. Mature at 2' - 3' tall and wide. Zone 6.

RASPBERRY SHORTCAKE® RASPBERRY – *Rubus idaeus*. PP22141. Good for container or landscape growing, this thornless raspberry is compact with a rounded habit. The medium size summer fruit is sweet. 2'-3' tall. Zone 4.

#2 \$12.95

BLACKBERRY

CHESTER BLACKBERRY – *Rubus spp.* This thornless variety produces large, very sweet, high quality fruit that ripens in July. Excellent for fresh use, jams, jellies and baked products. Self-fruitful. Zone 5.

TRIPLE CROWN BLACKBERRY – *Rubus spp.* Named for its three crowning attributes – flavor, productivity and vigor. Vines are high yielding, semi-trailing and thornless. Fruit ripens in early July. Self-fruitful. Zone 5.

MARIONBERRY – *Rubus hybrid*. This is a cross between Boysenberry and wild Blackberry. Vigorous vines produce large, delicious berries best for fresh eating, jams, preserves and desserts. Fruit ripens in July. Self-fruitful. Zone 5.

TAYBERRY – *Rubus spp.* Developed in Scotland, this is a cross between the blackberry Aurora and the Tetraploid raspberry. Large berries are reddish-purple with an excellent, slightly aromatic flavor. Excellent for freezing, canning, jams, and jellies. Ripens in July. Self-fruitful. Zone 5.

#2 \$12.15

BLUEBERRY

BLUECROP BLUEBERRY – *Vaccinium corymbosum*. A mid-season, good flavored berry. Consistently produces clusters of medium-to-large, light blue fruit of good quality. Hardy and more drought resistant than most. Plant two varieties for best fruit production. Early mid-season. Zone 4.

BLUEJAY BLUEBERRY – *Vaccinium corymbosum*. Open, loose clusters of medium-to-large light blue berries with a mild, slightly tart flavor. Good dessert quality. Plant two varieties for best fruit production. Early. Zone 5.

BLUERAY BLUEBERRY – *Vaccinium corymbosum*. This variety produces small, tight clusters of large, medium blue fruit with very sweet, slightly tart, aromatic flavor. Plant two varieties for best production. Early mid-season. Zone 4.

COVILLE BLUEBERRY – *Vaccinium corymbosum*. This variety produces large sized, medium blue fruit with good, aromatic flavor. Excellent for freezing and jellies. Plant two varieties for best fruit production. Late. Zone 5.

NEW! CABERNET SPLASH™ – *Vaccinium corymbosum*. A Northern Highbush blueberry with an abundant fruit set which ripens early mid-season. This variety has good ornamental interest with dark wine color foliage aging to green in summer and vibrant red in the fall. Compact, upright habit and good in containers. Self pollinating. Mature at 3'-4' tall and wide. Zone 4.

EARLIBLU BLUEBERRY – *Vaccinium corymbosum*. These medium sized, light blue, berries have an excellent, mild, sweet flavor. Vigorous variety. Plant two varieties for best fruit production. Early. Zone 5.

ELLIOTT BLUEBERRY – *Vaccinium corymbosum*. Nice ornamental bush with bluish green leaves and late blooming flowers. Fruit is small-to-medium in size and light blue in color. Flavor is mild. Mature at 5'-8'. Self-pollinating. Late. Zone 4.

JERSEY BLUEBERRY – *Vaccinium corymbosum*. Long, loose clusters of small-to-medium light blue berries. Vigorous, fast growing, bush with open,

spreading canes. Plant two varieties for best production. Mid-season. Zone 4.

LOWBUSH BLUEBERRY – *Vaccinium angustifolium*. This native shrub is woody and low to the ground like a ground cover. It has great fall color, is adaptable in many areas of the mid-Atlantic, northeast and the Midwest. The small sweet berry is loved by people and wildlife. Plant multiple lowbush varieties for best fruit set. Mature at 6'-24". Zone 2.

PATRIOT BLUEBERRY – *Vaccinium corymbosum*. This early season blueberry bears consistent crops of large berries. Lower growing than most highbush blueberries, this variety is adaptable to many soil types and is somewhat resistant to phytophthora. Early. Zone 3.

PINK LEMONADE BLUEBERRY – *Vaccinium corymbosum*. The only pink blueberry out there, Pink Lemonade offers wonderful pink flowers that give way to beautiful pink blueberries. The berries have a mild, pleasant flavor that ripen mid- to late-season. Zone 4.

PINK POPCORN™ BLUEBERRY – *Vaccinium corymbosum*. A northern highbush blueberry producing pale pink fruit with a darker pink blush which ripen in early to mid-season. True blueberry flavor and aroma. Self-fertile, but plant two for better production. Not bothered by pests or disease. Prefers acidic soil with adequate moisture. Mature at 4'-5'. Zone 3.

CHIPPEWA BLUEBERRY – *Vaccinium corymbosum x Vaccinium angustifolium*. Medium-large sky blue fruit is smoothly sweet and ripens mid-season. A cold hardy half-high blueberry variety. Plant a second cold hardy variety for the best fruit production from each. Compact growth habit. Can be grown in a container. Mature at 3'-4'. Zone 3.

NORTHBLUE BLUEBERRY – *Vaccinium corymbosum x Vaccinium angustifolium*. Medium sized fruit with a juicy, wild blueberry flavor ripen mid-season. Best for fresh eating and baking. A cold hardy half-high variety. Plant a second cold hardy blueberry variety for the best fruit production from each. Open and upright growth habit. Mature at 3'-4'. Zone 3.

NORTHCOUNTRY BLUEBERRY – *Vaccinium corymbosum x Vaccinium angustifolium*. Medium sized fruit with a classic, wild blueberry flavor ripens early mid-season. A cold hardy half-high variety. Plant a second cold hardy blueberry variety for the best fruit production from each. Compact and spreading habit. Suitable for container growing. Mature at 2' x 3'. Zone 3.

POLARIS BLUEBERRY – *Vaccinium corymbosum x Vaccinium angustifolium*. Medium sized, aromatic and very sweet fruit ripens early season. A cold hardy half-high blueberry variety. Plant another cold hardy variety with Polaris for the best fruit production from each. Mature at 3'-4'. Zone 3.

TOP HAT BLUEBERRY – *Vaccinium angustifolium* 'Top Hat'. Pea-sized light blue fruit follows lovely white flowers. A cold hardy blueberry with a delicious flavor. Good for container growing. Grows best in full sun. Plant a second cold hardy blueberry variety for best fruit production from each. Mature 2' x 2'. Zone 3.

NORTHLAND BLUEBERRY – *Vaccinium corymbosum x Vaccinium angustifolium*. These berries have a wild blueberry flavor that is great for pies and fresh eating. Very productive and vigorous plant even after the harshest of winters. Plant two varieties for best fruit production. Zone 3.

#2 \$11.99
#5 \$21.95

CRANBERRY

PILGRIM CRANBERRY – *Vaccinium macrocarpon*. Pilgrim is an attractive, evergreen groundcover with dainty foliage. Its small pink flowers produce an abundant crop of tasty red berries. Habit is spreading, growing only about 6" in height. Self-fruitful. Zone 4.

#2 \$16.60

GRAPE

CONCORD SEEDLESS GRAPE – *Vitis labrusca*. Seedless. Standard of quality for bluish-black grapes. Excellent distinctive flavor used for table, juice, jelly and wine. Vigorous, hardy, strong growing, productive vine. Self-fruitful. Zone 4.

EDELWEISS GRAPE – *Vitis labrusca*. Greenish-white to pale-green grapes ripen early and produce large clusters of fruit used primarily for juice and jelly. Excellent disease resistance. Self-fruitful. Zone 4.

JUPITER GRAPE – *Vitis spp.* PP13309. Medium sized clusters of large, blue, seedless fruit with distinct muscat flavor are produced by these vines. Self-fruitful. Zone 5.

KING OF THE NORTH GRAPE – *Vitis labrusca*. Medium sized juicy, tart, blue fruits that are excellent for juice, jelly and wine making. Productive and vigorous, these vines are resistant to common grape diseases and insects. Self-fruitful. Zone 4.

MARQUIS GRAPE – *Vitis spp.* A white seedless grape that grows in large clusters of large berries. Flavor is fruity and rich and is good for fresh eating and wine making. Self-fruitful. Zone 5.

MARS GRAPE – *Vitis labrusca*. Seedless, medium-to-large, sweet flavored, juicy grapes are deep blue at maturity. Flavor is similar to Concord. Among the most cold hardy of the seedless grapes. Slip-skin. Self-fruitful. Zone 5.

RELIANCE GRAPE – *Vitis labrusca*. This seedless, juicy grape is a favorite with its deep red color and rich flavor. Vigorous vines produce big clusters of these beauties. Self-fruitful. Zone 5.

VANESSA GRAPE – *Vitis labrusca*. Seedless, blushing red grape with a very firm skin. Flavor is sweet and tangy perfect for juice and jams. Self-fruitful. Zone 5.
#2\$12.20

WINE HYBRID GRAPE

CAYUGA WHITE GRAPE – *Vitis labrusca*. Cayuga White makes an excellent white wine. Fruit is light bodied and light green in color. Very productive and disease resistant. Self-pollinating. Zone 5.

CHAMBOURCIN GRAPE – *Vitis vinifera*. Produces medium sized, bluish-black fruit that cluster in large, moderately loose bunches. Makes superior quality, tart, Claret-type wine. Late season. Self-fruitful. Zone 6.

FRONTENAC GRAPE – *Vitis riparia*. This red grape is winter hardy and is used to produce full bodied, high quality wine. Resistant to common grape diseases. Ripens mid-season. Self-pollinating. Zone 3.

LA CRESENT GRAPE – *Vitis ‘LaCrescent’*. Developed by the University of Minnesota, this selection has excellent winter hardiness, disease resistance and excellent wine quality. The grapes have a very distinct apricot-like flavor and good aromatics. The long, loose clusters turn golden brown when mature. Mid-season. Self-fruitful. Zone 4.

MARECHAL FOCH GRAPE – *Vitis vinifera*. A French wine grape with long, loose clusters of medium sized, bluish black grapes. Ripens early and can be used to make cherry flavored fresh juice or excellent red wine. Self-pollinating. Zone 4.

MARQUETTE GRAPE – *Vitis ‘Marquette’*. PPAF. An excellent quality red wine grape with high levels of cold hardiness and disease resistance. Bold summer foliage, showy fruit, and some fall color, along with its twisted trunking makes this vine attractive year round. Mid-season. Self-fruitful. Zone 4.
#2\$13.70

HONEYBERRY

(*Lonicera edulis var. kamtschatica*). Native to Eastern Siberia, this unique member of the Honeysuckle family produces sweet and tasty fruit. The plant is exceptionally hardy and forms an attractive small bush that produces very early berries about the size and flavor of blueberries.

BLUE MOON™ HONEYBERRY
An attractive, spreading shrub with velvety, bright green leaves. Fruit is large and tasty. Plant two varieties for proper pollination. Mature size 4-5'. Zone 3.

BLUE PACIFIC™ HONEYBERRY
Attractive spreading habit, light green foliage, and bears large crops of dark blue, tasty berries. Plant two varieties for proper pollination. Mature size 3'. Zone 3.

BLUE VELVET™ HONEYBERRY
This compact spreading variety is very unique with its attractive grayish-green velvety foliage. Its very large blue berries are flavorful and great for fresh eating and preserves. Plant two varieties for proper pollination. Mature size 4' x 4'. Zone 3.
#2\$17.30

HOPS

CASCADE HOPS – *Humulus lupulus ‘Cascade’*. (Not available in 2021). Traditional American Hop aroma. Citrusy with grapefruit characteristics. Vigorous grower. Plant hops rhizomes in full sun and well-drained soil. Self pollinating. Zone 4.

WILLAMETTE HOPS – *Humulus lupulus ‘Willamette’*. Fruity, floral essence. Peppery and herbaceous spice. Vigorous grower with beautiful foliage. Plant in full sun and well-drained soil. Self pollinating. Zone 4.
#3\$16.05

RASPBERRY

ANNE RASPBERRY – *Rubus idaeus*. PP10411. This variety is everbearing and produces large, yellow fruit on new canes. Flavor is very sweet. Self-fruitful. Zone 4.

BRISTOL BLACK RASPBERRY – *Rubus idaeus*. An excellent quality, large, jet black berry with rich but mild, sweet flavor that's best used for fresh eating, desserts, freezing, canning and jelly. Vigorous, productive, upright plant with compact, sturdy canes. Ripens mid-season. Self-fruitful. Zone 4.

CAROLINE RASPBERRY – *Rubus idaeus*. PP10412. Everbearing. Large, firm red fruit with a unique intense raspberry flavor. This variety is very vigorous with long fruiting periods. Self-fruitful. Zone 4.

HERITAGE RED RASPBERRY – *Rubus idaeus*. This everbearing variety produces large, sweet, dark red berries from July until frost. Heritage will bear fruit the first year. Self-fruitful. Zone 4.

POLANA RASPBERRY – *Rubus idaeus*. These good flavored, glossy berries are large and highly productive. Vigorous canes. A great choice for early fall raspberries. Self-fruitful. Zone 3.

PRELUDE RASPBERRY – *Rubus idaeus*. PP11747. This variety was recently released by the N.Y. State Experiment Station and is identified as the earliest ripening summer red raspberry. Vivid red berries are good flavored and an excellent choice when earliness and quality are required. Vines are vigorous, hardy and will produce some fall berries. Self-fruitful. Zone 4.
#2 \$12.20

SEA BERRY

(*Hippophae rhamnoides*). A native of Central Asia and Europe, the Sea Berry is relatively new to North America. Sea Berry is a very striking ornamental shrub with narrow and graceful grayish green foliage accented by branches covered with bright orange berries. Fruit is tasty and an excellent source of vitamin C, A & E. This plant is salt and drought tolerant and has the ability to grow in and improve poor soils.

BOTANICA™

This Russian variety produces a large crop of bright orange good flavored fruit. Upright habit is attractive. Male Sea Berry required for proper pollination. Mature height 6-10'. Zone 3.

GARDEN'S GIFT™

A Russian variety that produces large crops of fruit that are great for juice and preserves. Male Sea Berry required for proper pollination. Mature height 6-10'. Zone 3.

MALE SEA BERRY

A striking ornamental with large, golden-brown, flower buds. The Male Sea Berries do not produce fruit but will pollinate the female varieties. One male plant can pollinate up to 8 female plants. Mature height 6-10'. Zone 4.

#3 \$17.30

GOJI BERRY

BIG LIFE BERRY® – *Lycium barbarum*. This Chinese selection, also known as wolfberry, produces large crops of bright red fruit. Mature height 5-7'. Add \$.50 for royalty. Zone 5.

SWEET LIFE BERRY® – *Lycium barbarum*. A Chinese variety that produces red fruit. Mature height 5-7'. Add \$.50 for royalty. Zone 5.

#3 \$18.20

ALMOND

ORACLE™ ALMOND – *Prunus dulcis* 'Oracle'. The variety produces large semi-hard shelled nuts. Partially self fertile, so planting two varieties will produce larger crops. Mature height: 10-12'. Zone 5.

PRIMAVERA™ ALMOND – *Prunus dulcis* 'Prima'. Productive and reliable, this hardy and very late blooming variety bears good crops of sweet, softshell nuts. Partially self-fertile, so planting two varieties will produce larger crops. Mature height 20'. Zone 5.
#7 \$37.25

CHESTNUT

CHINESE CHESTNUT – *Castanea mollissima*. Bristly, apple size burrs contain 3-7, medium-to-large, crisp nuts. Dense, lustrous foliage provides good shade. Plant two for proper pollination. Zone 4.
#7 \$33.15

DUNSTAN CHESTNUT – *Castanea spp.* A blight resistant American x Chinese hybrid. Nuts are superior in size and taste. Plant two Dunstan chestnuts for proper pollination. Zone 4.
#7 \$38.85

PECAN

PAWNEE PECAN – *Carya illinoensis*. The most widely planted pecan in the U.S., Pawnee is disease resistant and produces large nuts that ripen in late October. Bears nuts in 5-7 years. Pollinator required by another pecan variety. Mature height 50-75'. Zone 6.

#7 \$37.25

BUTTERNUT, HEARTNUT & WALNUT

BUTTERNUT – *juglans cinera*. This native tree, often called white walnut, was an important tree in American forests. Nuts mature in fall when the kernels are sweet and oily with a buttery flavor. Native Americans depended on this tree for the nuts and made syrup from the sap. Somewhat self-pollinating, but it is best to plant more than one tree. Mature height 40-60'. Zone 3.

SAUBER WALNUT – *Juglans nigra* 'Sauber'. A fast growing Black Walnut cultivar which produces consistent crops of good quality and flavorful nuts. This variety is self-fertile utilizing wind as a pollinator. It is best to plant two trees for optimum nut production from each. Mature at 70' x 40'. Zone 4.

CARPATHIAN ENGLISH WALNUT – *Juglans regia*. (Not available in 2021). A lovely tree producing medium to large, crunchy, English-type walnuts which ripen in October. Bears fruit in 4-7 years when two are planted near each other for proper cross-pollination. Hardy in cold temperatures yet heat tolerant. Mature at 30'-40' tall and wide. Zone 5.

#7 \$37.25

HAZELNUT

AMERICAN HAZELNUT – *Corylis Americana*. A strong multi-stemmed shrub producing desirable edible nuts which attract wildlife and game. Performs best in full sun. Plant two for best nut production. Mature height 10'-15'. Zone 4.

#7 \$37.40

ACER

NEW! BURGUNDY BELLE® RED MAPLE – *A. rubrum* ‘Magnificent Magenta’. A red maple with year-round interest. Emerging foliage becomes a medium green in summer turning orange or red in September, then burgundy in October. Canopy is compact and rounded. In maturity 45’ tall x 15’ wide. Deciduous. Zone 5.

#7\$48.90

AUTUMN BLAZE® MAPLE – *A. x freemanii* ‘Jeffersred’. PP4864. Foliage is medium green with a fall color being brilliant orange-red and long lasting. Habit is upright branching, forming a broadly oval shape. Mature size 50’ x 40’. Zone 3.

ARMSTRONG MAPLE – *A. rubrum* ‘Armstrong’. A fastigate tree great for tight spaces, this red maple cultivar has wonderful fall color as the leaves turn from yellow to an orangey-red. Mature size 45’ x 15’. Zone 4. 7 gallon only.

OCTOBER GLORY® MAPLE – *A. rubrum* ‘October Glory’. PP2116. Tree shape is broadly oval to round. Summer foliage is a glossy, medium green turning deep red to reddish-purple in the fall. Variety is more adaptable to areas with mild winters and hot summer temperatures. Mature size 40’ x 35’. Zone 4.

REDPOINT® MAPLE – *A. rubrum* ‘Frank Jr.’ PP16769. Lush green foliage turns a brilliant red in the fall and its dominant central leader makes this fast growing tree a standout. Broad pyramidal form. Mature 45’ x 30’. Zone 5. 7 gallon only.

RED SUNSET® MAPLE – *A. rubrum* ‘Franksred’. This is one of the most highly rated and reliable of the red maple cultivars. It’s a vigorous growing tree with a strong and symmetrical branching pattern. Foliage

is dark green and glossy in the summer with fall color being brilliant orange-red to red. Mature size 45’ x 35’. Zone 4.

SUN VALLEY MAPLE – *A. rubrum* ‘Sun Valley’. An oval, symmetrical, densely branched tree with dark green foliage. The fall color is bright red. Mature height 40’x35’. Zone 4.

HOTWINGS® TATARIAN MAPLE – *Acer tataricum* ‘GarAnn’. PP15023. A superior selection of tatarian maple. Consistent scarlet red samaras appear in the summer. Fall leaf color changes from orange red on the outside of the plant to yellow in the middle. Strong branch unions make it less prone to storm damage. Mature size 25’ H x 20’ W. Zone 3.

CRIMSON SUNSET MAPLE® – *Acer truncatum x A. platanoides* ‘JWS-KW202’. PPAF. This tree’s foliage resembles that of Crimson King, but its form is more upright and compact. Thanks to the *Acer truncatum* parentage, it flourishes in the summer heat where few purple leafed plants will grow. Mature size 35’ x 25’. Zone 5. 7 gallon only.

PACIFIC SUNSET® MAPLE – *A. truncatum x A. platanoides* ‘Warrenred’. PP7433. Tree shape is upright spreading with rounded crown. Foliage is dark green, smooth and glossy. Beautiful fall colors range from yellow-orange to bright red. Mature size 30’ x 25’. Zone 4.

URBAN SUNSET® – *A. truncatum x. a platinoides* ‘JFS-KW187’. PP27545. This upright street tree is narrow and compact and produces few seeds. The fall foliage is red to burgundy. A great choice when a wide canopy is not desired. Mature size 35’ x 20’. Zone 4.
 #7, 6-7’ height, ¾-1” caliper.....\$47.70
 #15, 7-9’ height, 1-1¼” caliper\$76.20

NEW! FALL FIESTA SUGAR MAPLE – *A. Saccharum* ‘Bailsta’. A fast growing Sugar Maple with outstanding fall color. Glossy green leaves become vibrant hues of yellow, orange and red in autumn. Leathery foliage resists tattering. In maturity 50’- 75’ tall x 50’ wide. Zone 4.

LEGACY® SUGAR MAPLE – *Acer sacchuram* *Legacy*®. PP4979. This sugar maple has great fall color with reddish orange foliage, relatively fast growing for a sugar maple, it is also Japanese Beetle resistant. Mature size 50’ x 35’. Zone 5.

#7\$53.40

JAPANESE ACER

BLOODGOOD JAPANESE MAPLE – *A. palmatum* ‘Bloodgood’. A vigorous, upright grower with large, deep purplish-red foliage. It is one of the most popular red uprights and the standard for comparison among the purple leafed, tree form Japanese Maples. Mature size 18’ x 18’. Zone 5.

#7, 3-4’ height.....\$76.60

EMPEROR I JAPANESE MAPLE – *A. palmatum* ‘Emperor I’. A fine cultivar, distinguished by its bright red foliage. Typically holds its true red color thru the summer. Upright branching develops a broad shape with age. Heat tolerant. Mature height 10-12’. Zone 5.

#7, 3-4’ height.....\$76.60

RYUSEN JAPANESE MAPLE – *A. palmatum* ‘Ryusen’. PP18501. ‘Ryusen’ boasts a magnificent weeping habit with strong, pendulous branches bearing palmately divided leaves of bright green. The foliage on this slow grower turns brilliant shades of golden-orange and bright red in autumn. More heat and sun tolerant than many *A. palmatum* cultivars, ‘Ryusen’ leafs out late in spring, thus avoiding late frosts. Mature size 20’ H x 6-8’ W. Zone 5.

#7, 3-4’ height.....\$84.80

SHAINA JAPANESE MAPLE – *A. palmatum* ‘Shaina’. A unique dwarf with dark red, deeply divided leaves that grow in clusters. Fall color is bright red. Growth is compact. Mature 9-10’. Zone 6.

SEIRYU JAPANESE MAPLE – *A. palmatum* var. *dissectum* ‘Seiryu’. An upright laceleaf maple, this tree has smaller delicate leaves than most. Beautiful light green foliage in the early spring and gold to yellow fall foliage. Mature size 10-15’ x 8-12’. Zone 5.

CRIMSON QUEEN JAPANESE MAPLE –

A. palmatum dissectum ‘Crimson Queen’. This red laceleaf cultivar maintains its deep purple-red color through the summer. Foliage is heat resistant, with scarlet fall color. Habit is weeping and mounded. Mature height 6’. Zone 5.

INABE SHIDARE JAPANESE MAPLE –

A. palmatum dissectum ‘Inabe Shidare’. This lace leaf weeper is a fast grower with purple foliage that holds its color well in the summer heat. Sturdy branches. Mature size 7’ x 10’. Zone 5.

PURPLE GHOST JAPANESE MAPLE –

A. palmatum ‘Purple Ghost’. This medium size upright maple leafs out in the spring with deep purple leaves with dark veins. Fall color is bright red to orange. Tolerates sun well. Mature size 8’ x 4’. Zone 5.

TAMUKEYAMA JAPANESE MAPLE – *A. palmatum dissectum* ‘Tamukeyama’.

This is an outstanding variety among the laceleaf weepers. Leaves are a very rich deep purple and hold their color through the heat of the summer. Mature size 8’ x 12’. Zone 5.

VIRIDIS JAPANESE MAPLE – *A. palmatum dissectum*

‘Viridis’. Weeping laceleaf form. Does well in shade. Green leaves turning yellow, golden and orange in fall. Zone 6.
#7, 3-4’ height.....\$76.70

AMELANCHIER

AUTUMN BRILLIANCE® SERVICEBERRY – *A. x grandiflora* ‘Autumn Brilliance’.

PP5717. Form is strong, upright and spreading with medium green foliage. White spring flowers, brilliant red fall color and edible fruit makes this a great selection. Mature height 20’. Zone 4.
#7, single stem\$45.30
#7, clump.....\$45.30

SPRING FLURRY™ SERVICEBERRY – *A. laevis*

‘JFS-Arb’. PP15304. A street tree Amelanchier with a strong central leader. Shape is upright oval with medium green foliage. Clusters of pure white flowers cover this tree in early spring and fall color is orange. Mature height 35’. Zone 4.
#7, 5-6’ height.....\$45.30

1-800-323-3008

BETULA

DURA HEAT™ RIVER BIRCH – *B. nigra* ‘BNMTF’.

Glossy, dark olive green leaves are smaller and more closely spaced than those of the species. Bark exfoliates early, exposing whitish patches. Mature size 40’ x 25’. Zone 4.

HERITAGE® BIRCH – *B. nigra* ‘Cully’.

PP4409. This selection of river birch has a broadly pyramidal shape with light green glossy foliage. The light bark color peels and exposes mottled patches of cream, orange and pinkish tan colors. Fall foliage is yellow. Mature size 40’ x 30’. Zone 4.
#7, 5-6’ clump.....\$46.60

CERCIDIPHYLLUM

HANNA’S HEART® – *C. japonica*.

PP21711. This new introduction is upright, compact and great for smaller spaces. It prefers full sun, moist soil and high pH. Fall foliage is yellow. Mature size is 25’ x 12’. Zone 4.
#7\$47.10

KATSURA TREE – *C. japonicum*.

The bluish-green foliage on this tree is quite an eye catcher with its delicate heart shaped leaves. Autumn color is a mix of bright yellow, pink and orange-red. Mature height 40’. Zone 5.
#7, 5-6’ height, ⅞”– 1” caliper\$45.55

CERCIS

ACE OF HEARTS REDBUD – *C. canadensis* ‘Ace of Hearts’.

PP17161. Clusters of light violet, sweet-pea-like blossoms appear in early spring, followed by small, semi-glossy and heart shaped leaves. Tree is compact and perfect for smaller yards. Mature 12’ x 15’. Zone 5.
#7, 30-36” height.....\$47.95

ALBA – *C. canadensis* ‘Alba’.

In early spring, small white flowers appear in abundance on the leafless branches. Heart-shaped leaves emerge bronze, quickly turning green. Fall color is yellow. Mature height 20-30’. Zone 4.
#7, 4-5’ height, ⅝-¾” caliper\$45.95

EASTERN REDBUD – *C. canadensis*.

Wide spreading with medium green foliage. Flowers are rosy pink and fall color is yellow. Mature size 25’ x 25’. Zone 4.
#7, 5’ height, ¾” caliper.....\$45.95
#15, 6-7’ height, 1-1¼” caliper\$74.70

NEW! FLAME THROWER® REDBUD – *C. canadensis* ‘NC2016-2’.

PP31260. From the J. C. Raulston Arboretum at NC State, this Cercis has persistent color from spring through fall. Pink flowers are followed by foliage which emerges burgundy, becoming hues of yellow and then green often with multiple shades on a single branch. Mature at 15’- 20’ tall x 15’ wide. Zone 5.
#7\$48.70

FOREST PANSY REDBUD – *C. canadensis* ‘Forest Pansy’. Tree is upright with spreading branches. Foliage is deep purple paling to bronze-green. Produces a magenta rose flower. Mature height 20’. Zone 5.

#7, 4-5’ height, 5/8-3/4” caliper \$45.95
 #15, 6-8’ height, 3/4-1” caliper..... \$74.70

NEW! GOLDEN FALLS® REDBUD – *C. canadensis* ‘NC2015-12’. PPAF. Interesting plant architecture, narrow and weeping, an excellent selection for small spaces! In spring, new foliage is tinged with orange, followed by bright golden leaves which hold up well in the heat and sun. Developed by the J. C. Raulston Arboretum at NC State University. Mature at 8’- 10’ tall by 3’- 4’ wide. Zone 5.

#7 \$48.70

HEARTS OF GOLD REDBUD – *C. canadensis* ‘Hearts of Gold’. PPAF. This selection has bright gold, heart shaped foliage that first emerges a beautiful red. Leaves that are shaded by others will turn green. Clusters of lavender purple flowers pop in early spring. Resistant to leaf scorch. Mature 15’ x 18’. Zone 5.

#7, 4-5’ height, 5/8-3/4” caliper \$47.95

LITTLE WOODY REDBUD – *C. canadensis* ‘Little Woody’. PP15854. One of the first compact introductions. Habit is vase shaped with very a distinct branching structure. Early spring flowers are purple. Mature 10’. Zone 5.

#7, 30-36” height \$47.95

PINK HEARTBREAKER WEEPING REDBUD – *C. canadensis*. PPAF. Exceptional weeping form with strong branching. The leaves are smaller than the species and juvenile leaves are red, turning dark green. Flowers are lavender-pink. Mature height 15’. Zone 4.

#7, 4-5’ height, 5/8-3/4” caliper \$48.70

RISING SUN™ REDBUD – *Cercis canadensis* ‘JN2’ PP21451. This heat tolerant *Cercis* introduction offers beautiful apricot colored foliage in spring, which turns to a speckled green in summer and finally finishing in autumn with a lovely golden color. Blooms are rosy in color. Mature height 12’. Zone 5.

#7, 6-7’ height. 7/8-1” caliper..... \$48.70

DON EGOLF REDBUD – *C. chinensis*. Vivid, rosy mauve flowers cover the stems in early spring. Foliage

is dark green and heart shaped. Habit is compact, slow growing and multi-stemmed. Mature height 9’. Zone 6.

#7, 30-36” height \$47.95

RUBY FALLS REDBUD – *C. canadensis* ‘Covey’ x ‘Forest Pansy’. PP22097. This weeping redbud is a very compact grower with beautiful maroon red heart shaped foliage. Perfect for a small garden. Mature height 6’. Zone 5.

#7, 4-5’, 5/8”-3/4” caliper \$48.70

CHIONANTHUS

CHINESE FRINGETREE – *C. retusus*. Fragrant white flowers with fringe-like petals hang in clusters that appear in the spring just after the leaves have emerged. Fall foliage is yellow and winter reveals attractive, exfoliating gray bark making this ornamental tree interesting for all seasons. Mature size 20’ x 20’. Zone 5.

#7, 5-6’ height, 3/4-7/8” caliper \$44.25

FRINGETREE – *C. virginicus*. Oval, spreading tree with medium-to-dark green foliage produces small greenish-white, clustered flowers that are wonderfully fragrant. Mature size 18’ x 20’. Zone 4.

#7, 3-4’ clump \$45.50

CLADRASTIS

YELLOWWOOD – *Cladrastis kentukea*. Excellent tree with bright green foliage that fades to yellow in the fall and flowers that are white and fragrant. Mature size 30’ x 40’. Zone 4.

#7, 6-7’ height. 7/8-1” caliper..... \$46.10

#15, 7-9’ height. 1-1½” caliper \$73.95

CORNUS

EUROPEAN VARIEGATED DOGWOOD – *C. alba* ‘Argenteo-marginata’. Foliage is green with a creamy white margin. Winter stem color is a deep red. A great accent plant, it is quite dramatic against a dark colored backdrop. Mature height 10’. Zone 3.

BAILEYI RED TWIG DOGWOOD – *C. sericea*. Rich green leaves turn reddish purple in the fall. Flowers are white and fruit is blue. Winter stem color is reddish. Mature height 9’. Zone 3.

YELLOW TWIG DOGWOOD – *C. sericea* ‘Flaviramea’. Bright yellow stems on young growth of this bushy shrub are attractive in winter. Flowers are white followed by white fruit. Mature height 9’. Zone 3.

#7, 3-4’ height \$17.50

JUNE SNOW DOGWOOD – *C. controversa*. (Not available in 2021) A fast growing tree with wide spreading branches. White flower clusters often exceed 6” in diameter. Fall color is mottled orange-yellow, red, and purple-red. Mature height 30’. Zone 5.

#15, 5-6’ height \$74.40

CHEROKEE BRAVE™ DOGWOOD – *C. florida rubra* ‘Comco #1’. PP10166. Deep red flowers. New foliage is burgundy and leaves are larger than most *Cornus florida*. Tree form. Mature height 20-30’. Zone 5.

CHEROKEE PRINCESS DOGWOOD – *C. florida*. A very vigorous white flowering selection with large, glossy green leaves. Tree shape is upright oval with rounded crown. Fall foliage is red. Mature height 24’. Zone 6.

#7, 3-4’ height, 5/8-3/4” caliper \$41.50

#7, 4-5’ height, 3/4-7/8” caliper \$46.50

#7, 5-6’ height, 7/8-1” caliper..... \$52.70

CELESTIAL SHADOW® DOGWOOD – *C. x* ‘Celestial Shadow’. (Not available in 2021). Variegated green leaves have generous margins of canary yellow and make a lovely backdrop for dazzling white flowers. In the fall leaves turn varying shades of purple and pink. Good disease resistance. Mature at 25’ tall x 20’ wide. Zone 5.

KOUSA® DOGWOOD – *C. kousa*. (Not available in 2021). A small, deciduous, vase shaped flowering tree which is often multi-stemmed. White flowers are petal-like pointed bracts which are followed by pinkish-red berry-like fruits in summer. Fruit is edible but best left for the birds. Good disease and insect resistance. Mature at 15’- 30’ tall and wide. Zone 5.

BLUE RAY™ DOGWOOD – *C. kousa chinensis* 'JN6'. PPAF. Striking blue-green foliage provides a beautifully subtle backdrop for 3”- 4” ivory-white blooms to truly shine. In the fall, leaves deepen to red adding renewed interest to this unique vase-shaped tree. Good disease and insect resistance. Mature at 15’- 20’ tall and wide. Zone 5.

CONSTELLATION® DOGWOOD – *C. kousa x C. florida* 'Rutcan' Constellation®. PP7210. White flowering dogwood blooms after *florida* and before *kousa*. Borer and disease resistant. Tree form. Mature height 25’. Zone 5.

SCARLET FIRE® DOGWOOD – *C. kousa* 'Rutpink'. PP28311. An extraordinary introduction from Rutgers. Pink pointed bracts vary in color from deep pink to fuchsia. New foliage is deep green tinged with purple. In summer 1” pink fruit emerges and later in the fall the deep green foliage turns red. Long flowering, disease and pest resistant and both cold and heat tolerant. Mature at 25’. Zone 5.

STELLAR PINK® DOGWOOD – *C. kousa x C. florida* 'Rutgan' Stellar Pink®. PP7207. Pink flowering dogwood that blooms after *florida* and before *kousa*. Borer and disease resistant. Tree form. Mature height 20-25’. Zone 5.
 #7, 3-4’ height, 5/8-3/4” caliper \$44.30
 #7, 4-5’ height, 3/4-7/8” caliper \$49.40
 #7, 5-6’ height, 7/8-1” caliper..... \$54.80

COTINUS

ROYAL PURPLE SMOKE TREE – *C. coggygria*. A small open tree that flowers in summer with pink smoke like puffs. Keeps color through summer in part or full shade with reddish purple fall color. Mature height 10-15’ and width 8-10’. Zone 5.
 #7 \$45.70

CRATAEGUS

WINTER KING HAWTHORN – *C. viridis* 'Winter King'. Winter King is an attractive hawthorn with silvery bark that contrasts nicely with dark green, glossy leaves. Spring flowers are white, fall fruit is red. Mature height 20’. Zone 4.

#7, 5-6’ height, 3/4-7/8” caliper \$47.05
 #15, 7-8’ height, 1-1 1/4” caliper \$73.25

FAGUS

EUROPEAN BEECH – *fagus sylvatica*. A large deciduous ornamental shade tree. A good selection for large lawn or open space. Noted for its smooth gray bark which resembles elephant hide. Mature at 40’- 60’ tall and 35’- 50’ wide. Zone 4.
 #7, 4-5’ height, 5/8-7/8” caliper \$44.50

FRANKLINIA

FRANKLIN TREE – *F. alata*. This small tree with bright green foliage reveals fragrant, white, camellia like flowers in summer. Fall foliage turns vivid orange-red and its ridged grey bark with vertical white striations adds winter interest. Mature height 25’. Zone 5.
 #7, 4-5’ height..... \$46.30

GLEDITSIA

STREET KEEPER® HONEYLOCUST – *G. triacanthos* 'Draves'. PP21698. This honeylocust has a strong narrow upright habit. The fall yellow foliage is dramatic. Mature height 45’. Zone 4.
 #7, 6-7’ height, 7/8-1” caliper..... \$45.65
 #15, 7-8’ height, 1-1 1/2” caliper \$72.95

HALESIA

NEW! MOUNTAIN SILVERBELL – *H. monticola*. This flowering tree is very adaptable and grows well in sun or shade. The clusters of white bell shaped flowers hang below the foliage and are best seen from below. Fall foliage is yellow and exfoliating bark offers winter interest. Mature height 45’ and 25’ width. Zone 5.
 #7 \$46.75

HIBISCUS TREE FORM

BLUEBERRY SMOOTHIE™ – *Hibiscus syriacus*. PP26662. Large, lovely, double blue-purple blooms in summer, contrast nicely with vibrant green foliage. Flowers are like magnets for butterflies and hummingbirds. No messy seed pods with this sterile variety. Mature at 4’-5’ tall and 3’-4’ wide. Zone 5.

RASPBERRY SMOOTHIE™ – *Hibiscus syriacus*. PP27196. Large double raspberry colored flowers bloom mid to late summer. From Garden Debut. Zone 5.
 #7 tree form \$41.40

HYDRANGEA TREE FORM

PHANTOM TREE HYDRANGEA – *H. paniculata* 'Phantom'. This deciduous tree bears conical panicles, of creamy-white flowers that become blush-pink with age. Flower heads can grow up to 15” long. Blooms July – September. Mature height 8-10’. Zone 3.

PINK DIAMOND TREE HYDRANGEA – *H. paniculata* 'Pink Diamond'. Light pinkish-white flowers are prevalent from the beginning of the bloom period and become darker as the season continues. Vigorous grower. Mature height 15’. Zone 3.
 #7 \$53.80

LIMELIGHT™ TREE HYDRANGEA – *H. paniculata* 'Limelight'. PP12874. Flowers are a beautiful lime green in mid-summer, eventually changing to pink tones before fading to beige. Panicles are large, upright and cone shaped. Dark green leaves turn attractive shades of red in the fall. Royalty charge \$1.00. Mature height 12-15’. Zone 3.

PINKY WINKY™ TREE HYDRANGEA – *H. paniculata* 'DVPpinky'. PP16166. Large white flower panicles open in mid to late summer and florets turn pink as the flower grows creating a two-tone effect. Royalty charge \$1.00. Mature height 10’. Zone 3.

ColorChoice
Flowering Shrubs

ColorChoice
Flowering Shrubs

QUICK FIRE® TREE HYDRANGEA – *H. paniculata* ‘Bulk’. PP16812. Quick Fire® blooms up to one month earlier than other hydrangeas. This hardy variety will tolerate full sun. Flowers are white and quickly turn pink. By fall the flowers are rosy-pink. Royalty charge \$1.00. Mature 8’. Zone 3.

#7\$55.90

KOELREUTERIA

GOLDENRAIN TREE – *K. paniculata*. Rounded tree form with medium green foliage. A very impressive tree in mid-summer when it is covered with clusters of bright yellow flowers. Fall color is yellow. Mature size 30’ x 30’. Zone 5.

#7, 4-5’ height, ¾-7/8” caliper\$47.15

LABURNUM

VOSSII GOLDENCHAIN – *L. x watereri* ‘Vossii’. Vase shaped tree with dark green foliage and beautiful hanging clusters of golden yellow flowers. Mature height 25’. Zone 5.

#15, 7-8’ height, 1-1¼” caliper\$71.80

LAGERSTROEMIA

ACOMA Crape Myrtle – *L. indica x fauriei*. Low spreading, semi-pendulous, semi-dwarf, multi-stemmed growth habit. Panicles are pure white with golden anthers. Blooms from late June – September. Mildew resistant. Mature size 10’ x 11’. Zone 7.

NEW! BELLINI® Raspberry Crape Myrtle – *L. indica* ‘Conlagras’. PP29006. Compact size and delicious bright raspberry-red flower color, make this crape myrtle unique. A great choice for a foundation plant or mixed garden specimen. Mature size 3’- 4’ tall. Zone 5.

DYNAMITE® Crape Myrtle – *L. indica* ‘Whit II’. PP10296. Tall with cherry red blooms. Highly mildew resistant. Mature height 15’. Zone 6.

HOPI Crape Myrtle – *L. indica x fauriei*. Spreading, semi-dwarf, multiple stemmed growth habit. Medium pink flowers from late June–September. Disease resistant and hardy. Mature size 7½’ x 10’. Zone 5.

PINK VELOUR® Crape Myrtle – *L. indica* ‘Whit III’. PP10319. Buds open to bright pink flowers which provide a lush velour-like blanket from summer to fall. New foliage is maroon and ages to purplish green, then dark green. Highly mildew resistant. A Carl Whitcomb introduction. Mature size 12-15’. Zone 6.

POCOMOKE Crape Myrtle – *L. indica* ‘Pocomoke’. A multi-stemmed shrub with panicles of dark rosy pink flowers. Blooms throughout the summer. Attractive dark green foliage turns rich bronze-red in fall. Unique size for a crape myrtle. Makes a nice accent plant, alone or in masses. Cold hardy. Deciduous. Mature at 3’- 4’ tall and 4’- 5’ wide. Zone 6.

RASPBERRY SUNDAE® Crape Myrtle – *L. indica* ‘Whit I’. PP10297. The flowers are raspberry red with a white margin and habit is upright. Mature height 15’. Zone 6.

RED ROCKET® Crape Myrtle – *L. indica* ‘Whit IV’. PP11342. This variety produces beautiful cherry red flower spikes up to 20” long from summer to fall. Highly mildew resistant. Mature size 12-15’. Zone 6.

Rhapsody in Pink™ Crape Myrtle – *L. indica* ‘Whit VIII’. PP16616. This vigorous grower has dark wine new growth and showy, crepe like pink flowers throughout the growing season. It is considered a carefree plant because of its drought tolerance and high resistance to powdery mildew. Mature height 10-15’. Zone 6.

SARAH’S FAVORITE Crape Myrtle – *L. indica x fauriei*. Long lasting, white flowers are produced from mid-summer thru early fall. Fall foliage is burgundy and the peeling, cinnamon colored bark makes it an excellent choice for year round landscape interest. Mature height 20’. Zone 6.

TONTO Crape Myrtle – *L. indica x fauriei*. Semi-dwarf, multi-stemmed growth habit. One of the best cold hardy red selections. Light tan exfoliating bark. Mature size 10’ x 10’. Zone 5.

ZUNI Crape Myrtle – *L. indica x fauriei*. Globose, semi-dwarf, multi-stemmed growth habit. Medium lavender flowers from mid-July to late September. Mature size 9’ x 8’. Zone 5.

#3, Multi-stem (Dynamite®, Pink Velour®, Pocomoke, Rhapsody in Pink™, Tonto, Bellini).....\$14.55
#7, Multi-stem (all varieties except Pocomoke) ...\$31.35
#15, Multi-stem (Dynamite®, Pink Velour®, Rhapsody in Pink™, Raspberry Sundae® & Sarah’s Favorite)....\$59.60

LIRIODENDRON

EMERALD CITY® Tulip Tree – *L. tulipifera* ‘JFS-Oz’. This cultivar has a strong central leader with deep green glossy foliage. The yellow flowers are attractive to hummingbirds and butterflies. Mature height 55’ x 25’ width. Zone 5.

#7\$41.90

MAGNOLIA

ANN Magnolia – *M. liliflora x M. stellata* ‘Ann’. Deep purple-red flowers which bloom later than *M. stellata*. Shrubby grower to 8-10’ in height. Zone 5.

BLACK TULIP™ Magnolia– *M. x soulangiana* ‘Jurmağl’. PPAF. With rich, deep burgundy-red blooms, this magnolia makes a dramatic and elegant specimen tree in any landscape. Blooms appear before the foliage emerges. Can be grown in container or in masses to make an interesting hedge. Mature at 20’ x 10’. Zone 5.

BUTTERFLIES Magnolia – *M. acuminata* ‘Fertile’ x *M. denudata* ‘Sawada’s Cream’. PP7456. Beautiful dark yellow flowers appear before leaves. Flowers are 3-4” across. Mature height 20’. Zone 4.

JANE Magnolia – *M. liliflora x M. stellata* ‘Jane’. Flowers are purplish-red outside and white inside. Shrub form to 10-15’ in height. Zone 5.

NEW! LOIS Magnolia – *M. x brooklynensis* ‘Lois’. Later blooming than its parent ‘Elizabeth’, makes this bright yellow flowering deciduous magnolia less susceptible to frost damage. Flowers emerge before the foliage. Deer resistant. Mature at 30’ tall x 25’ wide. Zone 5.

MOONGLOW™ MAGNOLIA – *M. virginiana* ‘Jim Wilson’. PP12065. This variety has a distinct upright growth habit with dark green, semi-evergreen leaves. Flowers are creamy white with the scent of lemon. Mature height 35’. Zone 4.

NED’S NORTHERN BELLE SWEETBAY MAGNOLIA – *M. virginiana* ‘Ned’s Northern Belle’. Flowering in June and July, this sweetbay magnolia has larger flowers and is cold tolerant. Mature size 20’ x 20’. Zone 4.

ROYAL STAR MAGNOLIA – *M. stellata*. Pink buds open to nearly pure white star-like flowers. Blooms 10 to 20 days before 15-20’ in height and 10-15’ spread. Zone 4.

SWEETBAY MAGNOLIA – *M. virginiana*. Habit is loose and upright spreading with dark lustrous green leaves and fragrant creamy white flowers in spring and summer. Mature height 20’. Zone 5.

WATERLILY MAGNOLIA – *M. stellata*. Highly fragrant, rich pink buds open to white blossoms on bare stems. The flowers appear later than other star magnolias. Habit is upright and bushy. Mature 15-20’ in height. Zone 5.
 #3 (Ann, Jane, Royal Star, Sweetbay) \$16.20
 #7, 4-5’ \$38.70

BRACKEN’S BROWN BEAUTY MAGNOLIA – *M. grandiflora* ‘Bracken’s Brown Beauty’. This Southern magnolia is considered by Michael Dirr to be one of the best selections with its relatively compact dense pyramidal habit. Flowers are 5-6” in diameter. Mature 30’ x 15’. Zone 5.

EDITH BOGUE MAGNOLIA – *M. grandiflora* ‘Edith Bogue’. Evergreen tree that is suited for northern climates. Large, dark green leaves with rusty undersides. Large creamy white fragrant flowers in spring. Mature height 30’. Zone 5.

VICTORIA MAGNOLIA – *M. grandiflora* ‘Victoria’. Large, deep green leathery leaves. Cup shaped, fragrant white flowers all summer. Evergreen tree. Mature height 20’. Zone 6.
 #7 \$43.10

MALUS

DONALD WYMAN CRABAPPLE – *M. ‘Donald Wyman’*. Red buds open to white showy blossoms. Foliage is glossy green. Fruit is bright red. Mature height 20’. Zone 4.

GOLDEN RAINDROPS® CRABAPPLE – *M. transitoria* ‘Schmidcutleaf’. Has a very delicate appearance with its fine textured, deeply cut foliage and tiny golden yellow fruit. Form is upright, vase shape. Spring flowers are white. Mature height 20’. Zone 3.

PRAIRIFIRE CRABAPPLE – *M. ‘Prairifire’*. One of the best red leafed crabs, it has attractive reddish bark and long lasting pinkish-red flowers that produce dark red fruit. Shape is upright, spreading and rounded. Mature height 20’. Zone 4.

ROYAL RAINDROPS® CRABAPPLE – *M. ‘JFS-KW5’*. PP14375. Bright reddish pink flowers cover this crabapple in mid spring. Foliage is deep purple and cutleaf which gives season-long appeal. Disease resistant. Mature height 20’ and width 15’. Zone 4.
 #7, 5-6’ height, ¾-7/8” caliper \$45.65
 #15, 7-8’ height, 7/8-1” caliper (Prairifire and Royal Raindrops®) \$71.70

METASEQUOIA

AMBERGLOW – *M. glyptostrobooides*. (Not available in 2021). PPAF. Bright gold foliage emerges in the spring and becomes tinged with orange in the summer. It does not burn in full sun. Mature height 15’ x 7-8” width. Zone 6.
 #7, 5 -6’ height, ¾” caliper \$56.85

DAWN REDWOOD – *M. glyptostrobooides*. A deciduous, fast growing conifer. Pyramidal in habit with bright green needles that turn rusty orange in the fall. Mature height 70-100’ x 25’. Zone 5.
 #7, 5 -6’ height, ¾ - 1” caliper \$47.50
 #15, 6-8’ height, 1-1½” caliper \$74.95

MORUS

CHAPARRAL WEEPING MULBERRY – *M. alba* ‘Chaparral’. (Not available in 2021). A graceful, weeping form covered with attractive glossy foliage. Mature size 12’ x 16’. Bottom grafted. Zone 3.
 #15, 4-5’ height, heavy select, weeping \$62.60

NYSSA

BLACK TUPELO – *N. sylvatica*. This fast growing tree has a central dominant leader with a conical shape and dense foliage that is lustrous dark green. Fall leaf color is a brilliant red with yellow veins. Mature height 40’. Zone 4.
 #7, 6-7’ height, ¾-7/8” caliper \$46.30

WILDFIRE – *N. sylvatica* ‘Wildfire’. Spring growth reveals a surprising flush of deep red leaves that continue as long as the new growth emerges. Summer foliage is green and the fall reveals tints of orange-yellow to purple red. Mature height 40’. Zone 5.
 #7, 6-7’ height, ¾-7/8” caliper \$48.15

GREEN GABLE™ BLACK GUM – *N. sylvatica*. ‘NSUHH’. PPAF. This Tennessee introduction has an unusual upright and pyramidal shape. The fall foliage is a beautiful red. Mature height 50’. Zone 4.
 #7, ¾ -7/8” caliper \$48.15

OXYDENDRUM

SOURWOOD – *O. arboretum*. (Not available in 2020). Pyramidal to rounded shaped tree with dark green, glossy leaves that produces perfect white, urn-shaped flowers in June. Mature height 25-30’. Zone 5.
 #7, 6-7’ height, ¾-7/8” caliper \$46.75

PARROTIA

PERSIAN IRONWOOD – *parrotia persica*. A medium size low branched tree in the witch hazel family. Fall color is beautiful with red, yellow and orange foliage. Great for small and urban gardens. Mature height 20-30'. Zone 5.

#15, 7-9' height \$78.90

PHYSOCARPUS TREE FORM

COPPERTINA® – *P. opulifolius 'Mindia'*. PP16371. Beautiful copper foliage appears in spring and becomes deep bronzy red in the summer. The exfoliating bark adds to the beauty of the tree. This tree is native tree to Illinois and this selection is from France. Mature size 6-8'. Zone 3.

#7, 6-7' height, 7/8" caliper \$56.00

PLATANUS

EXCLAMATION!™ LONDON PLANETREE – *X. acerifolia 'Morton Circle'*. A strong central leader and pyramidal shape make this an excellent selection. Exfoliating bark begins at an early age. Some resistance to anthracnose and powdery mildew and frost cracking in cold climates. Mature size 60' x 40'. Zone 4.

#7, 6-7' height, 7/8-1" caliper \$45.00

#15, 7-8' height, 1-1 1/2" caliper \$72.95

PRUNUS

DWARF FLOWERING ALMOND – *P. glandulosa 'Rosea'*. A clumping multi-stemmed shrub that produces fluffy pink pom-pom flowers in early spring. Flowers are great in fresh cut arrangements. Foliage is light green. Deciduous. Mature 6' x 6'. Zone 4.

#7 \$28.30

KRAUTER VESUVIUS PLUM – *P. cerasifera 'Krauter Vesuvius'*. This tree is very similar to Thundercloud Plum in appearance, but is smaller and more upright. Very tolerant of hot, dry weather

conditions. Foliage is dark purple and flowers are light pink. Mature height 20'. Zone 5.

THUNDERCLOUD PLUM – *P. cerasifera 'Thundercloud'*. Single, pink flowers appear in early spring before the deep purple foliage. The foliage retains its deep purple color through the season. Mature 20'. Zone 5.

#7, 6-7' height, 7/8-1" caliper \$44.15

#15, 7-8' height, 1 1/4-1 1/2" caliper \$70.85

BEACH PLUM – *P. maritima*. This fruiting shrub is native to coastal dunes of the Northeastern United States. Since colonial times, people have collected this wild fruit to make preserves and jelly. Will tolerate salt spray. Mature size 6' x 6'. Self-pollinating. Zone 3.

#3 \$17.75

#7 \$24.70

NEW! PINK CASCADE® WEEPING CHERRY – *P. 'NCPHI'*. Developed at NC State, this is an improved weeping cherry. Cascading branches in spring are covered in bright pink blooms followed by dramatic purple-red to green foliage providing interest throughout the growing season. Grafted at 5'. Mature size 12 x 12'. Zone 5.

#7 \$79.90

PURPLELEAF SAND CHERRY – *P. cistena*. White to light pink flower and rich purple leaves. Very hardy, multi-stemmed bush. Excellent hedging plant. Mature height 10'. Zone 2.

#3 \$16.40

#7, 3-4' height, clump \$20.75

AKEBONO FLOWERING CHERRY – *P. yedoensis 'Akebono'*. This rapid growing variety produces soft pink, single flowers and forms a rounded spreading tree. Mature size is 25' x 25'. Zone 6.

#7, 5-6' height, 7/8-1" caliper \$44.15

#15, 7-8' height, 1 1/4-1 1/2" caliper \$70.85

AUTUMN FLOWERING CHERRY – *P. subhirtella 'Autumnalis Rosea'*. An upright spreading tree with slender branches. Foliage is medium green turning yellow-to-bronze in the fall. Semi-double to double light pink flowers are produced in November and again in the spring. Mature size 25' x 22'. Zone 5.

#7, 5-6' height, 7/8-1" caliper \$45.00

#15, 7-8' height, 1-1/4-1-1/2" caliper \$72.20

KWANZAN FLOWERING CHERRY – *P. serrulata 'Kwanzan'*. The most popular of all flowering cherries has large, double, deep-pink flowers. Habit is upright and spreading. Leaves appearing with flowers are reddish copper, later turning to dark green. Mature height 25'. Zone 5.

#7, 5-6' height, 7/8-1" caliper \$45.00

#15, 7-8' height, 1 1/4-1 1/2" caliper \$72.20

MT. FUJI FLOWERING CHERRY – *P. serrulata 'Mt. Fuji'*. The open, horizontal, spreading, and somewhat weeping habit is covered with very large, white flowers in early spring. Also known as Shirotae. Mature size 15' x 30'. Zone 6.

#7, 6-7' height, 7/8 - 1" caliper \$45.00

OKAME FLOWERING CHERRY – *P. 'Okame'*. Small, pink flowers are early and long lasting. Habit is upright branching and oval in form. Nice fall color of yellow-orange to orange-red. Mature height 25'. Zone 5.

#7, 5-6' height, 3/4 - 1" caliper \$45.00

SHIROFUGEN FLOWERING CHERRY – *P. serrulata*. (Not available in 2021). Fast growing flowering tree that has a wide spreading form. Large double flowers are purplish pink in bud opening to white. Young foliage is copper colored. Mature height 20-30'. Zone 5.

#7, 6-7' height, 7/8 - 1" caliper \$45.00

YOSHINO FLOWERING CHERRY – *P. x yedoensis*. Single, white-to-pink flowers are fragrant and bloom early spring. Foliage is dense and the leaves are glossy green. Growth habit is vigorous, with upright, spreading branches. Mature height 30'. Zone 6.

#7, 5-6' height, 7/8-1" caliper \$44.65

#15, 7-8' height, 1 1/4-1 1/2" caliper \$71.50

DOUBLE WEEPING CHERRY – *P. subhirtella 'Pendula Plena Rosea'*. A small tree with graceful, weeping branches covered with clouds of showy double, rose pink flowers in the spring. Top grafted. Zone 5.

#15, 4' height, #1 head, 1 1/4-1 1/2" caliper \$74.85

#15, 6' height, #1 head, 1 1/4-1 1/2" caliper \$74.85

SNOW FOUNTAINS® WEEPING CHERRY –

P. 'Snofozam'. A graceful weeper with a cascading form displays single white flowers in the spring. Branching is compact. Fall color is golden to orange. Top grafted. Zone 5.

- #15, 6' height, #1 head, 1-1¼" caliper.....\$78.40
- #15, budded, 5-6' height, 1-1¼" caliper\$80.40

BONFIRE DWARF ORNAMENTAL PEACH –

P. persica 'Bonfire'. Bonfire is a unique compact tree/shrub that is covered with soft pink, double flowers in early spring. Its leaves are an extraordinary deep burgundy that measure 8-10" in length. Foliage is very dense. Mature 6'. Zone 5.

- #7, 2-3' height, ⅝ -¾" caliper\$45.00

DOUBLE RED FLOWERING PEACH – *P. persica*

Ornamental peach. Flowers are profuse double rose red blooms. Mature height 20'. Zone 5.

- #7, 4-5' height, ⅝ -¾" caliper\$45.00

PYRUS

CLEVELAND SELECT FLOWERING PEAR –

P. calleryana 'Cleveland Select'. Improved calleryana pear with better branching. This is an oval shaped flowering pear, with white blooms and glossy green foliage that turns red-orange in fall. Mature height 35'. Zone 4.

- #7, 5-6' height, ⅞-1" caliper.....\$41.90
- #15, 8-9' height, 1¼-1½" caliper\$66.15

QUERCUS

BUR OAK – *Quercus macrocarpa*. Bur Oak has the largest acorn of any North American Oak which when set against the heavily lobed green leaves is stunning. Excellent park tree due to its spreading branches and ultimate height. Mature size 55' x 45'. Zone 3.

- #7, 6-7' height, ⅞-1" caliper.....\$44.15

GREEN PILLAR OAK – *Quercus palustris 'Pringreen'*

PP9093. Fastigate branching and a very dense columnar shape make this tree ideal for narrow street plantings. Dark green foliage is semi-glossy and turns a brilliant deep red in autumn. Mature size 50' x 15'. Zone 4.

- #15, 6-7' height, 1¼" caliper\$74.55

PIN OAK – *Quercus palustris*. Pin Oak is a tree with a very distinctive growth habit. The strong central leader is maintained to the top. Shape is pyramidal with slender horizontal branches. Fall color is rusty orange to red. Mature size 55' x 40'. Zone 4.

- #7, 6-7' height, ⅝-¾" caliper\$44.15
- #15, 8-9' height, 1-¼-1-½" caliper\$70.45

NORTHERN RED OAK – *Quercus rubra*. Quick growing oak with an open crown and smooth bark on younger trees. Beautiful flame red leaves in fall that really set this oak apart from the rest. Mature size 50' x 45'. Zone 4.

- #7, 6-7' height, ⅞-1" caliper.....\$44.15

SWAMP WHITE OAK – *Quercus bicolor*. Dark green leaves that fade to yellow during the fall and beautiful exfoliating bark give this tree year around beauty. Tolerant to adverse growing conditions. Mature 45' x 45'. Zone 4.

- #7, 6-7' height, ⅞-1" caliper.....\$44.15

WHITE OAK – *Quercus alba*. A resilient oak with dark green to almost dark blue green leaves that turn deep red in autumn. New growth will emerge in a soft shade of pink the following spring. Mature size 45' x 45'. Zone 4.

- #7, 6-7' height, ⅞-1" caliper.....\$44.15

WILLOW OAK – *Quercus phellos*. This is a well formed, broad, cone-shaped tree. Glossy dark green leaves turn pale gold in fall. Mature size 60' x 40'. Zone 5.

- #7, 5-6' height, ⅝-¾" caliper\$43.30
- #15, 8-9' height, 1-1¼" caliper\$69.05

SALIX

GOLDEN WEEPING WILLOW – *S. alba 'Niobe'*

Leaves are yellow-green, turning yellow in the fall. Habit is fast growing, rounded, and weeping. Mature 50'. Zone 3.

- #15, 6-7' height, 1-1¼" caliper\$73.30

BABYLON WEEPING WILLOW – *S. babylonica*

Attractive green pendulous branches create a waterfall effect. Fall color is yellow. Mature height 50'. Zone 6.

- #15, 6-7' height, 1-1¼" caliper\$72.60

WEEPING PUSSY WILLOW – *S. caprea 'Pendula'*

This graceful weeper will display beautiful silvery catkins in late winter. The catkins will open to reveal one of the first signs of spring. Mature height 8'. Top grafted. Zone 4.

- #15, 5' height, #1 head.....\$77.60

HAKURO NISHIKI WILLOW – *S. integra 'Hakuro Nishiki'*. A beautiful willow with variegated, tri-colored foliage of pink, white and green. Zone 4.

- #7, shrub form.....\$30.40
- #7, 4-5' graft.....\$53.75

ARCTIC BLUE WILLOW – *S. purpurea 'Nana'*

Very attractive, rounded, weeping form with finely textured blue green leaves. Zone 4.

- #7, shrub form.....\$30.40

STEWARTIA

JAPANESE STEWARTIA – *S. pseudocamellia*. Medium sized tree with camellia-like flowers in July – August and attractive red purple fall color. Beautiful cream and tan patches are revealed as its trunk begins to exfoliate with age. Mature height 30'. Zone 6. #15, 5-6' height, 7/8-1" caliper..... \$84.85

STYRAX

JAPANESE SNOWBELL – *S. japonicus*. A beautiful small tree, covered in June by pure white, pendulous bell-shaped flowers with bright yellow stamens. Mature size 20'. Zone 5. #7, 5-6' height, 5/8-3/4" caliper \$54.20

SYRINGA

IVORY SILK JAPANESE TREE LILAC – *S. reticulata* 'Ivory Silk'. Habit is compact yet sturdy with its upright spreading branches that become rounded with time. Foliage is deep green and the tree is covered in early summer with creamy white flower plumes. Mature 20' x 15'. Zone 4. #7, 6-7' height, 1" caliper \$59.95

PALIBIN TREE FORM – *S. meyeri* 'Palibin'. A favorite Korean lilac on a standard. Soft lilac purple flowers in mid spring. Mature size 6' x 5'. Zone 3. #7, 5-6' height, 1/2-3/4" caliper \$71.95

TAXODIUM

FALLING WATERS WEeping BALD CYPRESS – *T. distichum*. A true weeping conifer that sheds its needles in the fall after a brilliant show of orange to brown. Thrives in wet conditions; also drought tolerant. Mature height 15-20'. Zone 5. #7, 4-5' height, 1/2-3/4" caliper \$47.25

TILIA

GREENSPIRE® LINDEN – *T. cordata* 'Greenspire'. Habit is pyramidal in shape with uniform branching and a strong central leader. Foliage is dark green and the fall color is yellowish. Mature height 40'. Zone 4. #7, 6-7' height, 7/8-1" caliper \$44.50

ULMUS

JEFFERSON ELM – *U. americana* 'Jefferson'. This vase shaped elm has dark green foliage and is resistant to Dutch Elm Disease. This is a clone of the tree planted on the National Mall in Washington DC. Mature height 70'. Zone 4. #7, 6-7' height, 7/8 - 1" caliper..... \$42.10

ZELKOVA

GREEN VASE® – *Z. serrata* 'Green Vase'. PP5080. Tree is a vase shape with upright arching branches. Foliage is green and the fall color is orange. Mature size 50' x 40'. Zone 5. #7, 6-7' height, 5/8-3/4" caliper \$45.55
#15, 8-9' height, 1-1-1/4" caliper \$72.25

Eastern Shore Nursery of Virginia has developed Greener Plants® and joined with the Chesapeake Bay Foundation (cbf.org) to create awareness about water runoff and conservation in home gardens. The website www.greenerplants.com provides expert advice to your customers as well as a zip code finder for our retailers. Please join us in this consumer awareness initiative.

saving America's great watersheds one yard at a time.
